(b) The permittee shall conform to the requirements of NAC 444.976 for the disposal of asbestos.
(c) Operating records will be maintained at the site in accordance with NAC 444.7025 and reports of the quantity of solid waste recieved will be submitted on an annual basis to the Division.

10. Findings:

a. This permit is consistent with NRS 444.440 through 444.620, inclusive, and NAC 444.570 through 444.7499, inclusive.
b. This permit is consistent with Federal landfill regulations found in 40 CFR Part 258.
c. This facility is compatible with local land use planning.

11. This permit is approved based on the information given in the permit application, and the Addendum to the permit application approved by the Nevada Division of Environmental Protection. This permit may be modified by the Division if the statutes or regulations upon which the issuance of the permit is based change, or if a modification is otherwise necessary to protect public health and safety and the environment. Any discrepancies between information contained in the permit application and the actual construction and operation of the facility may be grounds for revocation of this permit and appropriate enforcement action. The permittee must inform the Division of any deviation from or change in the information in the application which may affect the permittee's ability to comply with applicable regulations or conditions of the permit. This permit may be revoked if written notice is given by the Division and compliance with permit conditions and applicable statutes and regulations is not maintained.
