Re: Nevada Division of Environmental Protection (NDEP) Concurrence to:  
*Laser Induced Fluorescence Investigation Work Plan – Former Underground Product Piping,  
Petroleum Tanks (Source Area 14)* dated February 2014

Facility NV Energy (NVE) Reid Gardner Station (RGS)  
NDEP Facility ID # H-000530

Dear Mr. Reed:

The NDEP has received and reviewed NVE's response to the NDEP's February 13, 2014 comments to the *Laser Induced Fluorescence Investigation Work Plan at Former Underground Product Piping, Petroleum Tanks (Source Area 14)*. The response to comments and revised work plan are dated February 27, 2014 and were received on by the NDEP on February 28, 2014.

The NDEP **concurs** with the response to comments and revised work plan with one caveat. The NDEP strongly suggests that electrical conductivity (EC) data be collected in addition to the Ultra-Violet Optical Screening Tool (UVOST) data. Even if the EC data is not analyzed concurrently with UVOST data, have the data available for future evaluation could be invaluable.

Please contact me with any questions or comments about this letter at (775) 687-9396 or [aoakley@ndep.nv.gov](mailto:aoakley@ndep.nv.gov)

Sincerely,

Alison Oakley, CEM  
Environmental Scientist III
