STATE OF NEVADA  
DEPARTMENT OF CONSERVATION AND NATURAL RESOURCES  
DIVISION OF ENVIRONMENTAL PROTECTION  
901 S. Stewart Street, Suite 4001  
Carson City, Nevada 89701

## Why You Should Attend

The Nevada Division of Environmental Protection (NDEP), Bureau of Air Pollution Control (BAPC) and Bureau of Air Quality Planning (BAQP) will provide you with a better understanding of why it is important to control fugitive dust and how to comply with the Nevada Air Quality Regulations.

Numerous activities create fugitive dust emissions and nuisances. Various fugitive dust control techniques are recommended for these different activities. The information provided will help you understand how you can reduce air pollution, improve working conditions, and comply with the law to avoid penalties.

In addition, you will learn what types of permits are required for different types of activities that create fugitive dust.

At the end of the workshop there will be time allocated for questions regarding the information and your specific operation.

## Who Should Attend?

- Land Developers
- Construction Company Owners
- Construction Site Supervisors
- Mining Companies
- Landscaping Companies
- Anyone who might create dust in their day to day activities

## Seminar Topics

### Air Pollution Defined:

- Common Air Pollutants
- Nevada Ambient Air Quality Standards
- Particulate Matter
- Fugitive Dust Regulations

### Permitting:

- What are the requirements?
- How to apply for a Surface Area Disturbance (SAD) permit.
- Penalty for non-compliance

### Control Techniques:

- Best Practical Methods
- Site Work Practices

## Place and Time
