

# Notice of Workshops to Solicit Comments on Proposed Regulations Nevada Administrative Code (NAC) 445A.450-.492

## PUBLIC WATER SYSTEMS

The Nevada Division of Environmental Protection (NDEP) is proposing to adopt regulations amending NAC 445A.450, 445A.4525, 445A.459 and repealing NAC 445A.4915. The following workshops have been scheduled to solicit comments from persons interested in the regulatory amendments (petitions) generally described below.

The Nevada Division of Environmental Protection (NDEP) is proposing to update its adoption by reference date for regulations that have been promulgated by the U.S. Environmental Protection Agency (U.S. EPA) from July 1, 2003 (the current adoption date) to July 1, 2005. During this period, the U.S. EPA codified previously adopted items related to the Arsenic Rule and promulgated final regulations to: add lab analysis options for coliforms, E. Coli, and uranium; add a detection limit for uranium analysis; reinstate language that the U.S. EPA inadvertently dropped from the Lead and Copper Rule; and fix numerous typos and errors in the Long Term 1 Enhanced Surface Water Treatment Rule and others.

The proposed amendments also address several other “cleanup” items. These items are necessary to clarify language or remove problems associated with “prospective adoption by reference” by adding certain dates and repealing NAC 445A.4915.

These amendments are necessary in order to acquire Primacy approval from the U.S. EPA for several components of Nevada’s Safe Drinking Water Program.
