Brian Sandoval, Governor

Leo M. Drozdoff, P.E., Director

Colleen Cripps, Ph.D., Administrator

NOTICE OF PROPOSED ACTION - Bureau of Mining Regulation & Reclamation

Web Posting: 7/3/2013

Deadline for Appeal: 8/3/2013

Columbus Salt Marsh Project
WPC Permit # NEV0098104
Columbus Salt Marsh LLC

The Administrator of the Division of Environmental Protection gives notice that an application for a renewal of a Water Pollution Control Permit (Permit) for the **Columbus Salt Marsh Project**, has been properly filed with the Division of Environmental Protection in Carson City. The applicant for renewal of Water Pollution Control Permit **NEV0098104** is:

Ryan Brunson
Columbus Salt Marsh LLC
2441 West Horizon Ridge Parkway, Ste. #100
Henderson, NV 89052

The mine and process facility is located in Esmeralda County, Section 17, Township 3 North, Range 36 East, Mount Diablo Baseline and Meridian, approximately 7 miles east of State Highway 95 between the town of Mina and Coaldale Junction.

The Columbus Salt Marsh Project is a mining and beneficiation operation with a maximum annual production rate of 792,000 tons of ore. Both gravity and chemical separation methods are utilized to produce various grades of calcium carbonate and a precious metal concentrate. Clay tailings are returned to the excavation area where they are partially dried and then returned to the mined areas as backfill. Decant process water recovered during the drying process is recycled repeatedly back into the slurrification and beneficiation process. When the salinity of the recycled water increases to a concentration where it is no longer practical to recycle, the water is directed to a basin for evaporation and recovery of the salt product.

Process make-up water is obtained from a well located on the project site and is recycled back into the process when possible. A protocol has been established to avoid operations within those areas where there is either surface water expression or a where artesian flow has been encountered. Facilities are required to be designed, constructed, operated and closed

without any discharge or release in excess of those standards established in the Permit or in regulation except for meteorological events which exceed the design storm event.

The Administrator is constrained to either issue the renewal Permit or to deny the application. The Administrator has made the tentative decision to issue the renewal Permit.

Persons wishing to comment upon the proposed Permit, to recommend terms and conditions for consideration of incorporation into the permit, or who request a public hearing pursuant to Nevada Administrative Code, (NAC) Chapter 445A, must submit their written comments, objections, or requests no later than 5:00 PM on the 30th day following the date of publication of this notice (publication date July 4, 2013, comments due August 3, 2013) to:

Division of Environmental Protection
Bureau of Mining Regulation and Reclamation
901 South Stewart Street, Room 4001
Carson City, Nevada 89701-5249

All comments or objections received during the public notice period will be considered in the final determination regarding this Water Pollution Control Permit. If the Division determines written comments or requests indicate a significant degree of public interest in this matter, the Administrator shall schedule a public hearing in accordance with the requirements of NAC 445A.405.

The draft Permit and all application documents are on file at the Division and are available for public inspection and copying pursuant to Nevada Revised Statute (NRS) 445A.665.
