The Administrator of the Division of Environmental Protection (the Division) gives notice that an application for a new Water Pollution Control Permit for the **Kings Valley Lithium Exploration Project**, a mining facility, has been properly filed with the Division of Environmental Protection in Carson City. The Applicant for Water Pollution Control Permit **NEV2015108** (Permit) is:

**Western Lithium Corporation

Reno, NV 89509**

The facility is located on public land in Humboldt County, within Section 8, Township 44 North, Range 35 East, Mount Diablo Baseline and Meridian, approximately 20 miles northwest of the town of Orovada, Nevada.

The Project consists of a small-scale open pit mining facility, pursuant to Nevada Administrative Code (NAC) 445A.410, designed to extract lithium ore, with a maximum permitted production rate of 18,200 tons of ore per year. The facility is comprised of a bulk sample test mine pit, overburden stockpiles, growth-media stockpile, and stormwater controls. The mined lithium ore will be shipped out of State for testing. Facilities are required to be designed, constructed, operated, and closed without any discharge or release in excess of those standards established in regulation except for meteorological events which exceed the design storm event.

The Administrator is constrained to either issue the Permit or to deny the application. The Administrator has made the tentative decision to issue the Permit.

Persons wishing to comment upon the proposed Permit, to recommend terms and conditions for consideration of incorporation into the Permit, or who request a public hearing pursuant to NAC 445A, must submit their written comments, objections, or requests by hand delivery or US Postal Service, or by facsimile or e-mail transmittal, no later than 5:00 PM on the 30<sup>th</sup> day following the date of publication of this notice (submittal end date 06 December 2015) to:
