RE: **REQUEST FOR EXTENSION ON THE CORRECTIVE ACTION REPORT FOR SOURCE AREA SOIL**
MARYLAND SQUARE PCE-SITE
3661 SOUTH MARYLAND PARKWAY
LAS VEGAS, NEVADA
FACILITY ID No. H-000086

Dear Ms. Siders:

NDEP previously sent correspondence, dated February 25, 2011, concurring with the Corrective Action Plan for Source Area Soil at the above referenced site. That letter requested the Corrective Action Report (CAR) be submitted to NDEP by September 8, 2011. Although excavation activities conducted to date have substantially reduced the amount of contaminant mass in site soil, field activities, including the addition of chemical oxidant into the open excavation, are expected to continue through mid to late September. Given this anticipated field schedule, an extension delaying the submittal of the CAR until October 31, 2011 is requested.

Please note that monitoring the effectiveness of in-situ chemical oxidation within the affected aquifer is anticipated to require several months of data collection that will be absent from the CAR submitted in October. This data and an interpretation of results will be subsequently provided as an addendum to the CAR (or equivalent), unless directed otherwise.

If you have questions or require additional information, please do not hesitate to contact me or Robert Manriquez, Program Manager, at 619.321.6748. Thank you for your time and consideration in this matter.

Regards,

A handwritten signature in black ink, appearing to read 'Tamara Pelham'.
