IMPORTANT INFORMATION

- The Application packet contains:
 - General Company Information Form
 - Surface Area Disturbance Form
 - Application Certification Document with Required Attachments
- The application is available from the Nevada Division of Environmental Protection – Bureau of Air Pollution Control (BAPC) in a Microsoft Word file or a PDF file on the internet at <https://ndep.nv.gov/air/permitting/download-permit-forms>. A printed copy of the application must be submitted (mailed or hand delivered), along with an electronic version.
- The application filing fee required by Nevada Administrative Code (NAC) 445B.327 must be submitted with the completed application. Checks must be made payable to the “Nevada State Treasurer, Environmental Protection” with “BAPC” noted in the memo line. Fees may also be submitted electronically at <https://epayments.ndep.nv.gov/>.
- This application shall be used for a new stand-alone Class II Surface Area Disturbance (SAD) Air Quality Operating Permits, revisions to existing Class II SAD Air Quality Operating Permits, revision to SAD Conditions within Class II Air Quality Operating Permits, and the renewal of Class II SAD Air Quality Operating Permits. This application packet is not for use for New Class II Air Quality Operating Permits, revisions to existing Class II Air Quality Operating Permits, the renewal of Class II Air Quality Operating Permits, an Administrative Amendment, a general permit, nor for a Request for Change of Location Approval permit for a temporary source.
- This application must be signed by the Responsible Official, as defined in NAC 445B.156. The certification/signature page is the last page of the application and the original “wet” signature must be provided.
- All items in the application must be addressed. If an item does not apply, “N/A” or similar notation must be entered in the appropriate blank. All other information must be provided. Incomplete applications will be returned to the Responsible Official within 10 working days of receipt of the application.
- For the renewal of a stand-alone Class II SAD Air Quality Operating Permit, a complete application and corresponding processing fee must be submitted in accordance with NAC 445B.3473, prior to the expiration date of the current operating permit. The BAPC suggests that the application be submitted well in advance of the timeline outlined in NAC 445B.3473 to ensure the application is deemed complete.
- Nevada Administrative Code 445B.22037 requires fugitive dust to be controlled, and requires an ongoing program, using best practical methods, to prevent particulate matter from becoming airborne. All construction activities which have the potential to adversely affect the local air quality must implement all appropriate measures to limit controllable emissions. Appropriate measures for dust control may consist of a phased approach to acreage disturbance rather than disturbing the entire area all at once; using wet suppression through such application methods as water trucks or water spray systems to control wind-blown dust; the application of soil binding agents or chemical surfactant to roadways and areas.

SURFACE AREA DISTURBANCE FORM

1. Project Name:
2. Total Acres Disturbed:
3. NAC 445B.22037 requires fugitive dust to be controlled (regardless of the size or amount of acreage disturbed), and requires an ongoing program, using best practical methods, to prevent particulate matter from becoming airborne. All activities which have the potential to adversely affect the local air quality must implement all appropriate measures to limit controllable emissions. Appropriate measures for dust control may consist of a phased approach to acreage disturbance rather than disturbing the entire area all at once; using wet suppression through such application methods as water trucks or water spray systems to control wind-blown dust; the application of soil binding agents or chemical surfactant to roadways and areas of disturbed soil; as well as the use of wind-break or wind limiting fencing designed to limit wind erosion soils.
4. Please check each box that applies for Best Management Practices (BMPs) used for controlling dust on project's disturbed areas:

- Water trucks
- Graveling/paving of roadway storage areas and staging areas
- Dust palliatives
- Posting and limiting vehicle speeds
- Ceasing operations during high wind events
- Fencing or berming to prevent unauthorized access to disturbed areas
- Application of water sprays on material storage piles on a regular basis
- Covering material storage piles with tarpaulin or geo-textiles; tenting
- Use of overhead water spray racks or water hoses
- Track-out controls (graveled entranced, exit area, and street sweeping)
- Landscape preservation and impact avoidance
- Wind fence
- Pre-watering of areas to be disturbed (including all unpaved onsite roads and staging areas)
- Inform all subcontractors (including truck drivers) of their responsibilities for the control of fugitive dust while they are on the project site
- Training of equipment operators to recognize fugitive dust generation and having the authority to shut down operations until water truck arrives and sprays water on the disturbed areas
- Other Applicable BMPs:
- Other Applicable BMPs:
- If using water trucks, list how many water trucks are used and their capacity in gallons:
