

BENEFICIARY ELIGIBLE MITIGATION ACTION CERTIFICATION

Beneficiary _____

Lead Agency Authorized to Act on Behalf of the Beneficiary _____
(Any authorized person with delegation of such authority to direct the Trustee delivered to the Trustee pursuant to a Delegation of Authority and Certificate of Incumbency)

Action Title:	
Beneficiary's Project ID:	
Funding Request No.	<i>(sequential)</i>
Request Type: (select one or more)	<input type="checkbox"/> Reimbursement <input type="checkbox"/> Advance <input type="checkbox"/> Other (specify): _____
Payment to be made to: (select one or more)	<input type="checkbox"/> Beneficiary <input type="checkbox"/> Other (specify): _____
Funding Request & Direction (Attachment A)	<input type="checkbox"/> Attached to this Certification <input type="checkbox"/> To be Provided Separately

SUMMARY

Eligible Mitigation Action <input type="checkbox"/> Appendix D-2 item (specify): _____ Action Type <input type="checkbox"/> Item 10 - DERA Option (5.2.12) (specify and attach DERA Proposal): _____			
Detailed Description of Mitigation Action Item Including Community and Air Quality Benefits (5.2.2):			
Estimate of Anticipated NOx Reductions (5.2.3):			
Identification of Governmental Entity Responsible for Reviewing and Auditing Expenditures of Eligible Mitigation Action Funds to Ensure Compliance with Applicable Law (5.2.7.1):			
Describe how the Beneficiary will make documentation publicly available (5.2.7.2).			
Describe any cost share requirement to be placed on each NOx source proposed to be mitigated (5.2.8).			
Total project budget: \$890,128.00	Project costs paid by the Trust: \$ 55,344.00	Project costs paid by the NDEP: \$ 342,156.00	Cost share requirement: \$ 492,628.00
Describe how the Beneficiary complied with subparagraph 4.2.8, related to notice to U.S. Government Agencies (5.2.9).			
NDEP sent emails to the representatives from the U.S. Department of the Interior and the U.S. Department of Agriculture listed in subparagraph 4.2.8 of the State Trust Agreement on February 23, 2018.			

If applicable, describe how the mitigation action will mitigate the impacts of NOx emissions on communities that have historically borne a disproportionate share of the adverse impacts of such emissions (5.2.10).

ATTACHMENTS
(CHECK BOX IF ATTACHED)

- Attachment A Funding Request and Direction.
- Attachment B Eligible Mitigation Action Management Plan Including Detailed Budget and Implementation and Expenditures Timeline (5.2.4).
- Attachment C Detailed Plan for Reporting on Eligible Mitigation Action Implementation (5.2.11).
- Attachment D Detailed cost estimates from selected or potential vendors for each proposed expenditure exceeding \$25,000 (5.2.6). [Attach only if project involves vendor expenditures exceeding \$25,000.]
- Attachment E DERA Option (5.2.12). [Attach only if using DERA option.]
- Attachment F Attachment specifying amount of requested funding to be debited against each beneficiary's allocation (5.2.13). [Attach only if this is a joint application involving multiple beneficiaries.]

CERTIFICATIONS

By submitting this application, the Lead Agency makes the following certifications:

1. This application is submitted on behalf of Beneficiary _____, and the person executing this certification has authority to make this certification on behalf of the Lead Agency and Beneficiary, pursuant to the Certification for Beneficiary Status filed with the Court.
2. Beneficiary requests and directs that the Trustee make the payments described in this application and Attachment A to this Form.
3. This application contains all information and certifications required by Paragraph 5.2 of the Trust Agreement, and the Trustee may rely on this application, Attachment A, and related certifications in making disbursements of trust funds for the aforementioned Project ID.
4. Any vendors were or will be selected in accordance with a jurisdiction's public contracting law as applicable. (5.2.5)
5. Beneficiary will maintain and make publicly available all documentation submitted in

support of this funding request and all records supporting all expenditures of eligible mitigation action funds subject to applicable laws governing the publication of confidential business information and personally identifiable information. (5.2.7.2)

Nevada

[BENEFICIARY]

**DETAILED DESCRIPTION OF MITIGATION ACTION ITEM INCLUDING
COMMUNITY AND AIR QUALITY BENEFITS (5.2.2)**

The Nevada Division of Environmental Protection (NDEP) is submitting this Eligible Mitigation Action Category 10 – DERA Option school bus replacement project to support the early retirement and replacement of two diesel-powered school buses, owned and operated by Carson City School District, with two brand-new electric-powered school buses, located in Carson City, Nevada. Upon completion of this project, the permanent scrapping of two Government-owned school buses will provide a direct benefit to air quality.

The details regarding the individual units being replaced through this project, as well as the replacement units, are included on pages 5-6 of this submission. The NDEP will work with the school district on the scrapping of the program-eligible school buses and will coordinate with their staff for routine updates and possible site visits to ensure a timely and efficient completion of this project. The NDEP will not seek to have the school district reimbursed for this project until they have provided sufficient scrapping evidence to the NDEP.

The total expected lifetime emissions reductions are provided in the table below. Emissions reductions were quantified using the EPA’s Diesel Emission Quantifier.¹

Pollutant	Emissions Reductions (tons)
NO _x	0.730
PM _{2.5}	0.046
CO	0.343
HC	0.140
CO ₂	129.5

ATTACHMENT FOR 5.2.7.2

Describe how the Beneficiary will make documentation publicly available

Subparagraph 5.2.7.2 of the Environmental Mitigation Trust Agreement for State Beneficiaries requires that Beneficiaries include in their funding requests:

A commitment by the Beneficiary to maintain and make publicly available all documentation submitted in support of the funding request and all records supporting all expenditures of Eligible Mitigation Action funds, subject to applicable laws governing the publication of confidential business information and personally identifiable information, together with an explanation of the procedures by which the Beneficiary shall make such documentation publicly available;

The Nevada Division of Environmental Protection (NDEP), the Lead Agency for the State of Nevada, is committed to maintaining and making publicly available all documentation submitted support of the funding requests and all records supporting all expenditures of Eligible Mitigation Action funds, subject to applicable laws governing the publication of confidential business information and personally identifiable information.

The public will be able to view these records on the NDEP's website (<https://ndep.nv.gov>). The NDEP will maintain these records on a Volkswagen (VW) Environmental Mitigation Trust Fund specific webpage that will be designed to support public access and limit burden for the general public. The NDEP's VW specific webpage can currently be found at <https://ndep.nv.gov/air/vw-settlement>.

The NDEP has created an electronic listserv, open to the public, used to communicate news, events, and information related the Environmental Mitigation Trust Fund (Mitigation Fund). The listserv, NevadaVWFund, is advertised through the NDEP website and at public events related to the Mitigation Fund.

Furthermore, the Senate Committee on Finance and the Assembly Committee on Ways and Means of the Nevada Legislature has requested¹ “that the Division of Environmental Protection provide semiannual reports to the Interim Finance Committee regarding the status of the Volkswagen settlement and the Mitigation Fund, including recommendations by established working groups for the proposed activities to be supported by the settlement funds, and the process established to distribute settlement funds in accordance with the settlement terms.” The meetings of the Interim Finance Committee follow the Nevada Open Meeting Law (Nevada Revised Statues Chapter 241).

This commitment by the NDEP is subject to the following Nevada laws governing the publication of confidential business information and personally identifiable information.

Chapters 603A and 239B of the Nevada Revised Statutes (NRS) provide definitions and requirements for handling *personal information*.

¹ Letter from state Senator Joyce Woodhouse, Chair of the Senate Committee on Finance - September 29, 2017

NRS Section 603A.040 defines ‘Personal Information’ as:

1. *“Personal information” means a natural person’s first name or first initial and last name in combination with any one or more of the following data elements, when the name and data elements are not encrypted:*
 - (a) *Social security number.*
 - (b) *Driver’s license number, driver authorization card number or identification card number.*
 - (c) *Account number, credit card number or debit card number, in combination with any required security code, access code or password that would permit access to the person’s financial account.*
 - (d) *A medical identification number or a health insurance identification number.*
 - (e) *A user name, unique identifier or electronic mail address in combination with a password, access code or security question and answer that would permit access to an online account.*
2. *The term does not include the last four digits of a social security number, the last four digits of a driver’s license number, the last four digits of a driver authorization card number or the last four digits of an identification card number or publicly available information that is lawfully made available to the general public from federal, state or local governmental records.*

NRS Section 239B.030 – *Recorded, filed or otherwise submitted documents* - states that:

1. *Except as otherwise provided in subsections 2 and 6, a person shall not include and a governmental agency shall not require a person to include any personal information about a person on any document that is recorded, filed or otherwise submitted to the governmental agency on or after January 1, 2007.*
2. *If personal information about a person is required to be included in a document that is recorded, filed or otherwise submitted to a governmental agency on or after January 1, 2007, pursuant to a specific state or federal law, for the administration of a public program or for an application for a federal or state grant, a governmental agency shall ensure that the personal information is maintained in a confidential manner and may only disclose the personal information as required:*
 - (a) *To carry out a specific state or federal law; or*
 - (b) *For the administration of a public program or an application for a federal or state grant.*

➤ *Any action taken by a governmental agency pursuant to this subsection must not be construed as affecting the legality of the document.*
3. *A governmental agency shall take necessary measures to ensure that notice of the provisions of this section is provided to persons with whom it conducts business. Such notice may include, without limitation, posting notice in a conspicuous place in each of its offices.*
4. *A governmental agency may require a person who records, files or otherwise submits any document to the governmental agency to provide an affirmation that the document does not contain personal information about any person or, if the document contains any such personal information, identification of the specific law, public program or grant that requires the inclusion of the personal information. A governmental agency may refuse to record, file or otherwise accept a document which does not contain such an affirmation when required or any document*

which contains personal information about a person that is not required to be included in the document pursuant to a specific state or federal law, for the administration of a public program or for an application for a federal or state grant.

5. *Each governmental agency may ensure that any personal information contained in a document that has been recorded, filed or otherwise submitted to the governmental agency before January 1, 2007, which the governmental agency continues to hold is:*

(a) Maintained in a confidential manner if the personal information is required to be included in the document pursuant to a specific state or federal law, for the administration of a public program or for an application for a federal or state grant; or

(b) Obliterated or otherwise removed from the document, by any method, including, without limitation, through the use of computer software, if the personal information is not required to be included in the document pursuant to a specific state or federal law, for the administration of a public program or for an application for a federal or state grant.

↪ *Any action taken by a governmental agency pursuant to this subsection must not be construed as affecting the legality of the document.*

6. *A person may request that a governmental agency obliterate or otherwise remove from any document submitted by the person to the governmental agency before January 1, 2007, any personal information about the person contained in the document that is not required to be included in the document pursuant to a specific state or federal law, for the administration of a public program or for an application for a federal or state grant or, if the personal information is so required to be included in the document, the person may request that the governmental agency maintain the personal information in a confidential manner. If any documents that have been recorded, filed or otherwise submitted to a governmental agency:*

(a) Are maintained in an electronic format that allows the governmental agency to retrieve components of personal information through the use of computer software, a request pursuant to this subsection must identify the components of personal information to be retrieved. The provisions of this paragraph do not require a governmental agency to purchase computer software to perform the service requested pursuant to this subsection.

(b) Are not maintained in an electronic format or not maintained in an electronic format in the manner described in paragraph (a), a request pursuant to this subsection must describe the document with sufficient specificity to enable the governmental agency to identify the document.

↪ *The governmental agency shall not charge any fee to perform the service requested pursuant to this subsection.*

7. *As used in this section:*

(a) "Governmental agency" means an officer, board, commission, department, division, bureau, district or any other unit of government of the State or a local government.

(b) "Personal information" has the meaning ascribed to it in [NRS 603A.040](#).

Chapter 239 of the NRS provides general principles for the definition and the handling of public records. In particular, subsection 239.010.3 states that:

A governmental entity that has legal custody or control of a public book or record shall not deny a request made pursuant to subsection 1 to inspect or copy or receive a copy of a public book or record on the basis that the requested public book or record contains information that is

confidential if the governmental entity can redact, delete, conceal or separate the confidential information from the information included in the public book or record that is not otherwise confidential.

Chapter 445B of the NRS (Air Controls) specifically provides further directions on what is confidential information and how such information must be handle in the context of the Air Program of the NDEP. In particular section 445B.570 – *Confidentiality and use of information obtained by Department*²; penalty – states that (footnotes added for clarity):

1. *Any information which the Department obtains in the course of the performance of its duties pursuant to the provisions of this chapter is public information unless otherwise designated as confidential information pursuant to the provisions of this section.*
2. *The emission of an air contaminant which has an ambient air quality standard or emission standard or has been designated as a hazardous air pollutant by regulation of the Commission cannot be certified as being confidential.*
3. *Any confidential information received by the Commission³, the Director⁴ or any local control authority which is certified in writing to the recipient as confidential by the owner or operator disclosing the information and verified and approved in writing as confidential by the recipient must, unless the owner expressly agrees to its publication or availability to the public, be used only:
 - (a) *In the administration or formulation of air pollution controls;*
 - (b) *In compiling or publishing analyses or summaries relating to the condition of the outdoor atmosphere which do not identify any owner or operator or reveal any confidential information;*or
 - (c) *In complying with federal statutes, rules and regulations.**
4. *This section does not prohibit the use of confidential information in a prosecution for the violation of any statute, ordinance or regulation for the control of air pollution.*
5. *A person who discloses or knowingly uses confidential information in violation of this section is guilty of a misdemeanor, and is liable in tort for any damages which may result from such disclosure or use.*
6. *As used in this section, “confidential information” means information or records which:
 - (a) *Relate to dollar amounts of production or sales;*
 - (b) *Relate to processes or production unique to the owner or operator; or*
 - (c) *If disclosed, would tend to affect adversely the competitive position of the owner or operator.**

ATTACHMENT C

**DETAILED PLAN FOR REPORTING ON ELIGIBLE MITIGATION ACTION
IMPLEMENTATION**

ATTACHMENT C

DETAILED PLAN FOR REPORTING ON ELIGIBLE MITIGATION ACTION IMPLEMENTATION

The Nevada Division of Environmental Protection (NDEP) will provide detailed reporting on this Category 10 – DERA Option vehicle replacement project in four ways: 1, timely updates to NDEP’s Volkswagen (VW) Environmental Mitigation Trust Fund webpage; 2, semiannual reporting to the Nevada Legislature’s Interim Finance Committee (IFC); 3, Nevada’s semiannual reporting obligation to Wilmington Trust (the “Trustee”); and 4, quarterly reports submitted to the Environmental Protection Agency (EPA).

NDEP maintains a VW Environmental Mitigation Trust Fund specific webpage that has been designed to support public access and limit burden for the general public. The NDEP’s VW specific webpage can currently be found at <https://ndep.nv.gov/air/vw-settlement>. Timely updates to the webpage will inform the general public on the project’s status as well as when this Category 10 – DERA Option replacement project has been completed.

Subparagraph 5.3 of the Environmental Mitigation Trust Agreement for State Beneficiaries details Nevada’s Reporting Obligations:

“For each Eligible Mitigation Action, no later than six months after receiving its first disbursement of Trust Assets, and thereafter no later than January 30 (for the preceding six-month period of July 1 to December 31) and July 30 (for the preceding six-month period of January 1 to June 30) of each year, each Beneficiary shall submit to the Trustee a semiannual report describing the progress implementing each Eligible Mitigation Action during the six-month period leading up to the reporting date (including a summary of all costs expended on the Eligible Mitigation Action through the reporting date). Such reports shall include a complete description of the status (including actual or projected termination date), development, implementation, and any modification of each approved Eligible Mitigation Action. Beneficiaries may group multiple Eligible Mitigation Actions and multiple sub-beneficiaries into a single report. These reports shall be signed by an official with the authority to submit the report for the Beneficiary and must contain an attestation that the information is true and correct and that the submission is made under penalty of perjury. To the extent a Beneficiary avails itself of the DERA Option described in Appendix D-2, that Beneficiary may submit its DERA Quarterly Programmatic Reports in satisfaction of its obligations under this Paragraph as to those Eligible Mitigation Actions funded through the DERA Option. The Trustee shall post each semiannual report on the State Trust’s public-facing website upon receipt.

NDEP shall, in the next semiannual report following the Trustee’s approval of this project, describe the progress implementing this Eligible Mitigation Action that will include a summary of all costs expended on the Eligible Mitigation Action through the reporting date. The report will also include a complete description of the status, development, implementation (including project schedule and milestone updates), and any modification to this Eligible Mitigation Action.

2021 Diesel Emissions Reduction Act (DERA) State Grants Work Plan and Budget Narrative Template

INSTRUCTIONS: States and territories applying for 2021 DERA State Grants should use this template to prepare their Work Plan and Budget Narrative.

Please refer to the 2021 DERA State Grants Program Guide full program details, eligibility criteria and funding restrictions, and application instructions.

SUMMARY PAGE

Project Title: Nevada Clean Diesel Program – Carson City School District Electric School Bus Project

Project Manager and Contact Information

Organization Name: Nevada Division of Environmental Protection

Project Manager: Sig Jaunaraajs (program contact) and Misti Gower (financial contact)

Mailing Address: 901 S. Stewart Street, Ste 4001
Carson City, Nevada 89701

Phone: (775) 687-9392 for Sig Jaunaraajs and (775) 687-9494 for Misti Gower

Fax: (775) 687-5856

Email: sjaunara@ndep.nv.gov and mgower@ndep.nv.gov

Project Budget Overview:

	2021
EPA Base Allocation	\$342,156.00
EPA Match Bonus (if applicable)	\$171,078.00
Voluntary Matching Funds (if applicable)	\$342,156.00
Mandatory Cost-Share	\$981,932.60
Additional Leveraged Funds	\$8,220.64
TOTAL Project Cost	\$1,845,543.24

Project Period

October 1, 2021 – September 30, 2023

Summary Statement

The Nevada Division of Environmental Protection (NDEP) will use FY 2021 DERA funds to effectively and permanently reduce NO_x and PM_{2.5} in Carson City and one other Nevada county. NDEP is planning to provide pass-through funding to Carson City School District and one other Nevada school district to support the retirement of four program-eligible diesel-powered school buses and replace them with zero emission, battery electric equivalents.

Past DERA State Grant Program successes in Nevada are summarized online at:

<https://ndep.nv.gov/air/air-pollutants/clean-diesel-program>

SCOPE OF WORK

STATE/TERRITORY GOALS AND PRIORITIES

The Nevada Clean Diesel Program complements state and local efforts to maintain the National Ambient Air Quality Standards (NAAQS). Areas of air quality concern within the program area include Clark County, the Stateline area of Douglas County and Carson City, the Pahrump area of Nye County, and Washoe County. Clark County is a maintenance area for PM₁₀, CO, and the 1997 O₃ standard and areas of Clark County are currently in nonattainment for the 2015 O₃ standard. The Stateline area of Douglas County and Carson City is a maintenance area for CO. Measures are being taken in the Pahrump area of Nye County to reduce PM₁₀ levels. Washoe County is a maintenance area for CO and PM₁₀.

According to the 2017 National Emissions Inventory, diesel-based mobile source NO_x emissions accounted for more than 40 percent of the State's total NO_x emissions. When comparing Nevada's counties, mobile source NO_x emissions are much higher in Clark County (with Washoe County's emissions coming in second) than anywhere else in the State.

VEHICLES AND TECHNOLOGIES

The NDEP is supporting the early retirement of four program-eligible diesel-powered school buses in partnership with two Nevada school districts: two with Carson City School District and two with a second school district. All buses will be replaced with zero emission, battery electric equivalents. While a fleet description sheet listing some of the details regarding some of the expected vehicle replacements has been attached with this Work Plan, the typical usage characteristics of the school buses is provided below.

The Carson City School District school bus fleet is primarily used to transport children throughout Carson City. Carson City is an independent city and Nevada's capital. The city has seasonal particulate matter concerns and the portion of the city in the Lake Tahoe basin is a CO maintenance area. NDEP intends to find a second partner to support the early retirement and replacement of two additional program-eligible diesel-powered school buses in an area of Nevada where criteria pollutant emissions are a concern. NDEP fully expects to have identified the second project partner by the start of the project period.

NDEP will ensure that both participating school districts select only program-eligible diesel-powered school buses for early retirement and that they provide some of the necessary photographic evidence (including side profile, VIN, engine serial number, and engine photos) to the NDEP prior to entering into a Subgrant Agreement.

ROLES AND RESPONSIBILITIES

Acting in our role as project management for FY 2021 DERA State Grant Program funds, NDEP has been coordinating the planning for these projects with our partner school districts and

Nevada’s primary electric utility, NV Energy. NV Energy is involved in project coordination and execution as they are covering the majority of project costs through their electric school bus incentive program as well as working with our partner school districts to ensure that the necessary charging infrastructure is installed.

Upon receipt of the Notice of Award, NDEP will enter into Subgrant Agreements with our project partners that will define all the deliverables the partner must provide in order to receive program funds. This includes responsibilities to follow the FY 2021 DERA State Grant program guidance and all DERA State Grant program Terms and Conditions. Program funds are delivered on a reimbursement basis and are only delivered once the partner has demonstrated the successful replacement and scrapping of the program-eligible vehicles.

Participating fleets are required to contribute the minimum mandatory matching funds for replacement projects. As in past program years, school districts are enthusiastic community partners with a desire to reduce emissions from their fleets. Their participation reinforces the idea to the general public that diesel emission reduction projects are practical and effective. If the actual replacement costs of the vehicles selected for early-retirement and replacement end up being higher than the estimated replacement costs, our project partners have indicated their willingness to provide additional funding in order to ensure the project’s successful completion.

TIMELINE AND MILESTONES

The following represents a schedule of expected target dates, milestones, and completion dates to achieve specific tasks and accomplishments, during the project and budget period:

Table 1: Timelines and Milestones to Achieve Successful Completion of FY 2021 Projects

Activity	Date
NDEP begins solicitation for project partners	FY 2021, Quarter 2
NDEP selects project partners	FY 2021, Quarter 2
NDEP submits Workplan and Budget Narrative to EPA	FY 2021, Quarter 3
EPA issues Notice of Award	FY 2021, Quarter 4
NDEP enters into Subgrant Agreements with identified project partners	FY 2022, Quarter 1
Project partners begin procurement of vehicles for replacement	FY 2022, Quarter 1
EPA Quarterly Report Due	FY 2022, Quarter 1
Project partners provide updates to the NDEP on the status of vehicle procurement and report on any delays in completing their projects	FY 2022, Quarter 2
EPA Quarterly Report Due	FY 2022, Quarter 2
Project partners provide updates to the NDEP on the status of vehicle procurement and report on any delays in completing their projects	FY 2022, Quarter 3
Project partners begin to receive replacement vehicles	FY 2022, Quarter 3
Project partners begin to scrap vehicles being replaced	FY 2022, Quarter 3
EPA Quarterly Report Due	FY 2022, Quarter 3
Project partners provide updates to the NDEP on the status of vehicle procurement and report on any delays in completing their projects	FY 2022, Quarter 4
Project partners finish receiving replacement vehicles	FY 2022, Quarter 4
Project partners complete scrappage of vehicles being replaced	FY 2022, Quarter 4

Activity	Date
NDEP verifies evidence of scrappage provided by project partners and performs drawdowns to reimburse partners for successful project completion	FY 2022, Quarter 4
EPA Quarterly Report Due	FY 2022, Quarter 4
Final Report due to EPA	January 30, 2024

DERA PROGRAMMATIC PRIORITIES

The priorities of the Nevada Clean Diesel Program are aligned with the programmatic priorities of the Diesel Emissions Reduction Act of 2010, 42 USC 16131 et seq. These priorities will be met through the following:

1. NDEP aims to build a simple, yet effective program that maximizes public health benefits for as many Nevadans as practical. The Nevada Clean Diesel Program seeks to reduce exposure to harmful diesel emissions across Nevada. Diesel emissions reductions are determined using the Diesel Emission Quantifier (DEQ) and proposals achieving significant reductions in diesel emissions in terms of tons of pollution produced and reductions in diesel emissions exposure from vehicles, engines, and equipment operating in areas designated as poor air quality areas are given priority.
2. The Nevada Clean Diesel Program is implemented through a low-overhead programmatic structure to provide assistance in increasing fleet turnover to provide quantifiable diesel emissions reductions.
3. The program focuses on public services fleets that operate their vehicles a substantial amount of time within Nevada’s population centers and with public service fleets that provide services to sensitive populations.
4. This program will maximize the service life of the replacements through a Subgrant Agreement between the project partner and the NDEP. This agreement will require the recipients to maintain the equipment in compliance with the manufacturer’s recommended maintenance schedule. This includes instructions on manufacturer-recommended maintenance procedures and a full explanation of the warrantee provisions for the verified technologies.
5. Replacement projects will conserve diesel fuel by replacing legacy diesel vehicles with vehicles that are zero emissions or meet the most recent emission standards. Generally, the use of new technologies can reduce overall fleet diesel fuel consumption.

EPA’S STRATEGIC PLAN LINKAGE AND ANTICIPATED OUTCOMES/OUTPUTS

The program supports EPA’s 2018-2022 Strategic Plan Goals. That is, the Agency’s “Back-to-Basics” agenda and its three over-arching goals which reflect the Administrator’s core philosophies: 1, deliver a cleaner, safer, and healthier environment for all Americans and future

generations by carrying out the Agency's core mission; 2, provide certainty to states, localities, tribal nations, and the regulated community in carrying out shared responsibilities and communication results to all Americans; and 3, increase certainty, compliance, and effectiveness by applying the rule of law to achieve more efficient and effective agency operations, service delivery, and regulatory relief.

Partner fleets will permanently remove from service early and mid-2000's engine model year diesel-powered school buses and replace them with new, zero emissions school buses. Reducing these pollutants protects human health and the environment in several ways. The program will reduce emissions in the areas of Carson City that have seasonal particulate matter concerns. This will support the area's continued attainment status. Implementing this program will also help to mitigate regional air pollution.

Anticipated Outcomes

Anticipated outcomes of the Nevada Clean Diesel Program can be expressed in short, medium, and long-term considerations. In the short-term, a broad spectrum of Nevadans, from state and local leaders to health professionals and environmental advocates, will recognize the value of reducing diesel emissions in our communities. The importance of reducing diesel emissions is most pronounced where vulnerable populations, such as children and the elderly, are subject to both direct and prolonged exposure to the emission source. This recognition may foster support, both programmatic and financial, on the part of groups and individuals for continued diesel emission reduction efforts. The NDEP will post a summary of the projects funded by FY 2021 program funding and expected outcomes on the Nevada Clean Diesel Program webpage.

Medium-term outcomes are expected to include a continued reduction in fleet diesel emissions, instilling the program goals in other state and municipal fleets, and laying the groundwork for the continued replacement of other fleet vehicles.

From a long-term perspective, one expected outcome is reduced rates of certain respiratory ailments among sensitive groups in the program area. Numerous scientific studies have established a relationship between exposure to fine particulate matter (a component of diesel exhaust) and diseases such as lung cancer, asthma, pneumonia, and even heart disease. It is expected that some measurable reduction in disease rates will occur because of program implementation for those populations most at risk such as children, the elderly, and those already suffering from heart or lung disease. Additionally, there is an anticipated effect on other existing fleets to stimulate interest in further diesel emission reduction efforts. These might include retrofit or replacement programs, idle reduction efforts, or truck stop electrification and auxiliary power unit installation. NDEP hopes that the Nevada Clean Diesel Program will continue to foster an interest among all fleets using diesel-powered vehicles in Nevada in improving air

quality voluntarily through the use of retrofit technology, engine repowers, early attrition of their dirtiest vehicles, or zero emissions replacements.

Anticipated Outputs

Expected, measurable program outputs are quantified in two ways. The first measurable output is the number of vehicles that will be replaced. Based on the data and estimates provided by our partner school districts, the NDEP anticipates the early retirement of four school buses. Not including the mandatory cost-share (and any possible additional leveraged funds) the NDEP is awarding \$795,000.00 to fleets.

A second output is the reduction in emissions that will result from the expected service life of the new vehicle over that of the older, replaced vehicle. The Diesel Emissions Quantifier (DEQ) was used to calculate criteria pollutant reductions. Use of this calculation tool required that several assumptions be made concerning vehicle age, mileage, and other parameters. Results from the DEQ are in Table 2.

Table 1: FY 2021 Vehicle replacement information and estimated criteria pollutant reductions

Total Criteria Pollutant Reductions		
Pollutant	Annual Reduction (short tons)	Lifetime Reduction (short tons)
Nitrous Oxides (NO_x)	0.4228	1.9162
Particulate Matter (PM_{2.5})	0.0301	0.1359
Hydrocarbons (HC)	0.0842	0.381
Carbon Monoxide (CO)	0.1975	0.8962
Carbon Dioxide (CO₂)	64.3	282.5
Project #1 – Carson City Diesel to Battery Electric School Bus Replacement	Vehicle Class/Equipment	School Buses
	Number of Vehicles	2
	Model Year	1-2000 and 1-2002
	Estimated Remaining Useful Life	5 years and 3 years
Pollutant	Annual Reduction (short tons)	Lifetime Reduction (short tons)
NO _x	0.1716	0.6603
PM _{2.5}	0.0125	0.0479
HC	0.0346	0.1331
CO	0.0793	0.3053
CO ₂	33.6	129.5
Project #2 – Diesel to Battery Electric School Bus Replacement	Vehicle Class/Equipment	School Buses
	Number of Vehicles	2
	Model Year	2002
	Estimated Remaining Useful Life	5 years
Pollutant	Annual Reduction (short tons)	Lifetime Reduction (short tons)
NO _x	0.2512	1.2559
PM _{2.5}	0.0176	0.088
HC	0.0496	0.2479
CO	0.1182	0.5909
CO ₂	30.6	153

For Project #1, actual vehicle data provided by Carson City School District were used. For Project #2, default values from the DEQ were used for quantifying the emissions reductions of the vehicle replacements (assumed an upgrade year of 2022). A more accurate idea of expected emissions reductions will be calculated when the NDEP has identified a second project partner.

A third output is the reduction in cases of respiratory illness attributable to diesel emission exposure and the associated reduction in related healthcare costs. These benefits include reduced costs associated with premature deaths, hospital visits, and time lost from work and school.

SUSTAINABILITY OF THE PROGRAM

The Nevada Clean Diesel Program has been actively involved in supporting diesel-emission reduction solutions to state and municipal fleets in Nevada for more than a decade and shows no signs of slowing down. The NDEP actively promotes program successes, provides assistance to fleets (both public and private) in finding ways to reduce diesel emissions in their fleets, and attends conferences to both spread awareness about the Program's efforts and to learn more about cost-effective solutions to mitigating diesel emissions and transitioning Nevada's fleet of diesel-powered vehicles to zero- and near zero-emission solutions.

BUDGET NARRATIVE

2021 Itemized Project Budget

Budget Category	EPA Allocation	Mandatory Cost-Share	Additional Leveraged Funds	Voluntary Match (if applicable)		Line Total
				VW Mitigation Trust Funds	Other Funds	
1. Personnel	\$36,021	\$0	\$0	\$0	\$0	\$36,021
2. Fringe Benefits	\$14,038	\$0	\$0	\$0	\$0	\$14,038
3. Travel	\$0	\$0	\$0	\$0	\$0	\$0
4. Equipment	\$0	\$0	\$0	\$0	\$0	\$0
5. Supplies	\$0	\$0	\$0	\$0	\$0	\$0
6. Contractual	\$0	\$0	\$0	\$0	\$0	\$0
7. Other	\$453,023	\$981,933	\$8,221	\$342,156	\$0	\$1,785,332
8. Total Direct Charges (sum 1-7)	\$503,082	\$981,933	\$8,221	\$342,156	\$0	\$1,835,391
9. Indirect Charges	\$10,152	\$0	\$0	\$0	\$0	\$10,152
10. Total (Indirect + Direct)	\$513,234	\$981,933	\$8,221	\$342,156	\$0	\$1,845,543
11. Program Income	\$0	\$0	\$0	\$0	\$0	\$0

EXPLANATION OF BUDGET FRAMEWORK

Personnel

List all staff positions by title. Give annual salary, percentage of time assigned to the project, and total cost for the budget period.

Title	Annual Salary	Percent Time Commitment to Project	Total Cost to Budget
Chief, Bureau of Air Quality Planning	\$98,281.00	5%	\$4,914
Management Analyst 1	\$52,838.00	9%	\$4,755
Supervisor, Environmental Scientist 4	\$75,887.00	10%	\$7,589
Staff 2, Associate Engineer	\$75,322.00	10%	\$7,532
Environmental Scientist 1	\$56,152.00	20%	\$11,230
Personnel Total			\$36,021

Fringe Benefits

Identify the percentage used, the basis for its computation, and the types of benefits included.

Title	Annual Fringe Benefits	Percent Time Commitment to Project	Total Cost to Budget
Chief, Bureau of Air Quality Planning	\$28,754.00	5%	\$1,438
Management Analyst 1	\$27,604.00	9%	\$2,484
Supervisor, Environmental Scientist 4	\$35,253.00	10%	\$3,525
Staff 2, Associate Engineer	\$24,531.00	10%	\$2,453
Environmental Scientist 1	\$20,690.00	20%	\$4,138
Fringe Total			\$14,038

Travel

Specify the mileage, per diem, estimated number of trips in-State and out-of-State, number of travelers, and other costs for each type of travel.

No travel costs have been budgeted.

Supplies

“Supplies” means all tangible personal property other than “equipment”.

No supply costs have been budgeted.

Equipment

Identify each item to be purchased which has an estimated acquisition cost of \$5,000 or more per unit and a useful life of more than one year.

No equipment costs have been budgeted.

Contractual

Identify each proposed contract and specify its purpose and estimated cost.

No contractual costs have been budgeted.

Other

List each item in sufficient detail for EPA to determine the reasonableness and allowability of its cost.

NDEP will enter into subgrant agreements with Carson City School District and one other school district. These agreements will only fund vehicle replacement costs.

Line Item and Itemized Cost	Federal Funds	Voluntary State Match (paid by Nevada)	Mandatory Cost-Share (paid by fleet owner)	Additional Leveraged Funds	Total Project Cost
Project #1 – Carson City Diesel to Battery Electric School Bus Replacement					
Vehicle 1	\$113,255.69	\$85,539.00	\$245,483.15	\$2,055.16	\$446,333.00
Vehicle 2	\$113,255.69	\$85,539.00	\$245,483.15	\$2,055.16	\$446,333.00
Project #1 Subtotal	\$226,511.38	\$171,078.00	\$490,966.30	\$4,110.32	\$892,666.00

Project #2– Diesel to Battery Electric School Bus Replacement					
Vehicle 1	\$113,255.69	\$85,539.00	\$245,483.15	\$2,055.16	\$446,333.00
Vehicle 2	\$113,255.69	\$85,539.00	\$245,483.15	\$2,055.16	\$446,333.00
Project #2 Subtotal	\$226,511.38	\$171,078.00	\$490,966.30	\$4,110.32	\$892,666.00

Other Total	\$453,022.76	\$342,156.00	\$981,932.60	\$8,220.64	\$1,785,332.00
--------------------	---------------------	---------------------	---------------------	-------------------	-----------------------

Indirect Charges

If indirect charges are budgeted, indicate the approved rate and base.

Title	Annual Salary Plus Fringe	Indirect Rate	Percent Time Commitment to Project	Total Cost to Budget
Chief, Bureau of Air Quality Planning	\$127,035.00	20.28%	5%	\$1,288
Management Analyst 1	\$80,442.00	20.28%	9%	\$1,468
Supervisor, Environmental Scientist 4	\$111,140.00	20.28%	10%	\$2,254
Staff 2, Associate Engineer	\$99,853.00	20.28%	10%	\$2,025
Environmental Scientist 1	\$76,842.00	20.28%	20%	\$3,117
Indirect Total				\$10,152

NDEP has submitted to the EPA a request for an Indirect Cost Rate of 20.28 percent for state FY 2022, which is the rate used in this application.

Administrative Costs Expense Cap

The NDEP has budgeted \$60,211 from this program year to cover administrative expenses. These funds will go to covering personnel, fringe, and indirect costs associated with successfully executing the program. The proposed personnel and fringe benefit costs total \$50,059, which is 5.85 percent of the total project cost (total project cost includes the federal share as well as Nevada's voluntary cost-share).

Matching Funds and Cost-Share Funds

NDEP intends to use funds from the Volkswagen Environmental Mitigation Trust Fund for State Beneficiaries (State Trust) to meet the program voluntary match. Nevada has already submitted and received approval on multiple funding requests to Wilmington Trust (the Trustee managing the State Trust) relating directly to DERA State Grant Program projects (see <https://www.vwenvironmentalmitigationtrust.com/state-trust/nevada> for more information). The school districts will be meeting their mandatory cost-shares through a partnership with NV Energy, which will be using a ratepayer-funded program to support the funding of these fleet replacements (more information regarding NV Energy's Electric School Bus Incentive Program can be found on their website, <https://www.nvenergy.com/cleanenergy/electric-vehicles/school-buses>). The partner school districts will not be using any additional federal monies or State Trust funds to support the purchases of these vehicles.

Funding Partnerships

NDEP will enter into subgrant agreements with Carson City School District and one other school district. These agreements will only fund vehicle replacement costs. Also, the Nevada Clean Diesel Program is operated on a reimbursement basis and subgrantees will not be reimbursed until and unless they provide sufficient evidence of vehicle scrappage and project completion to the NDEP.

PUBLIC WORKS DEPARTMENT

MEMORANDUM

DATE: May 21, 2019
TO: Joe Perreira, Staff Engineer
FROM: Zac Haffner, Maintenance & Operations Manager 
SUBJECT: Fleet replacement schedule – 2002 Snow Plows

The City of Reno (COR) has struggled to fund the established Vehicular Equipment Replacement Schedule (RS) as outlined in its internal service fund policy #610 since the recession of the late 2000's. That policy calls for equipment to be replaced based off of an established service life for the different classes of vehicles that the city operates. The service life of many classes of vehicles/equipment were extended with a change to the RS that took effect 12/1/13 to better mirror longevity being had as well as to help with the shortfall in budget.

Each year that the replacement funding is short to the Fleet Management Fund, replacements are being delayed and/or fall behind other pieces of equipment that may have a higher use. Fleet Management has had to prioritize replacements based off of more than the service life replacement schedule alone, and that includes reviewing mileage or engine hours, departmental needs, age, condition, life-to-date costs, utilization, obsolescence, and funding. The shortfall in funding each year causes the annual request for replacements to be increased.

In FY18, Fleet Management noticed the numbers being requested were not going to be funded, and took a new approach of request. A detailed look was given to all equipment within the fleet and a 5-year catch up replacement schedule was discussed with the budget office. The plan adjusted replacements dates of all the equipment in the fleet. Fleet Management helped to fund the first year of the 5-year catch up plan by reducing reserves and its fuel budget. Unfortunately, Fleet Management was just made aware that the 5-year catch up plan will be short funds in year 2 of the mentioned plan.

This continual shortfall causes the service lives to be extended year after year. For example, the current snow plow (#220604) that is scheduled to be replaced working with the Nevada Division of Environmental Protection would have had its service life extended had it not been for the grant awarded through the Nevada State Clean Diesel Program.

Although the majority of the city's fleet is past its scheduled service life per the RS, each year service lives are extended due to the ongoing budget shortfalls. This is the case for the requested 2002 snow plows that are being proposed for replacement. The city is committing to early replacement of these four 2002 snow plows if grant funding can be obtained through the Nevada Clean Diesel Program.
