LIST OF ACRONYMS

BSDW = Bureau of Safe Drinking Water
BWPC = Bureau of Water Pollution Control
CWSRF = Clean Water State Revolving Fund
DWSRF = Drinking Water State Revolving Fund
EPA = Environmental Protection Agency
FFY = Federal Fiscal Year
IUP = Intended Use Plan
MHI = Median Household Income
NAC = Nevada Administrative Code
NDEP = Nevada Division of Environmental Protection
NRS = Nevada Revised Statute
PWSS = Public Water System Supervision
RCAC = Rural Community Assistance Corporation
SDWA = Safe Drinking Water Act
SDWIS = Safe Drinking Water Information System
SFY = State Fiscal Year
SWA = Source Water Assessment
SWAP = Source Water Assessment Plan
ULO = Unliquidated Obligations
USEPA = United States Environmental Protection Agency
UIC = Underground Injection Control
UICP = Underground Injection Control Program

I. INTRODUCTION

A. History and Legislation

The 1996 Amendments to the Safe Drinking Water Act (SDWA) authorized the Drinking Water State Revolving Fund (DWSRF). Nevada's allotment of the Federal Fiscal Year (FFY) 2015 DWSRF budget is \$12,614,000. These funds are available after Nevada successfully obtains a Capitalization Grant Award from the U. S. Environmental Protection Agency (EPA) for its DWSRF program.

In 1997, the Nevada State Legislature passed legislation, Senate Bill (SB) 302, which authorized the State Health Division to develop, implement and administer the DWSRF program in Nevada. In accordance with the SDWA, the legislation authorized the Treasurer of the State of Nevada to set up the account for the revolving fund and the account for set-aside programs. The 2003 Nevada State Legislature passed legislation, Assembly Bill (AB) 473, which transferred the DWSRF from the State Health Division to the Nevada Division of Environmental Protection (NDEP). NRS 445A.200 to 445A.295, inclusive, is the state statutes for the DWSRF and may be reviewed at the following Internet Web URL:

<http://www.leg.state.nv.us/NRS/NRS-445A.html>.

The regulations for the DWSRF promulgated by the Health Division, later revised by the State Environmental Commission, are found in Nevada Administrative Code (NAC) 445A.6751 to 445A.67644 inclusive and may be reviewed at the following Internet Web URL:

<http://www.leg.state.nv.us/NAC/nac-445A.html>

The SDWA requires that, for as long as the Fund or the set-aside accounts are in operation, each prepares an annual IUP to describe how it plans to use the DWSRF to meet the Act's objectives. The IUP must describe the use of a state's capitalization grant, state match funds, principal and interest from loan repayments, other interest earnings of the DWSRF, bond proceeds, funds designated for set-aside activities, funds transferred from or to the Clean Water State Revolving Fund (CWSRF) and any other monies deposited into the DWSRF. The IUP is the central component of the DWSRF grant application and communicates plans to stakeholders who include; public water systems, private systems, the public, EPA, and other state departments. The IUP provides specific details on key aspects of the program including the state's short- and long-term goals, the priority setting process used to rank projects and the list of projects eligible to receive funding from available DWSRF funding. Figure 1 on page 3 displays the role the IUP plays in the DWSRF funding process.

The program is administered by the Office of Financial Assistance (OFA) under the administration of the Nevada Division of Environmental (NDEP), and as such, is the

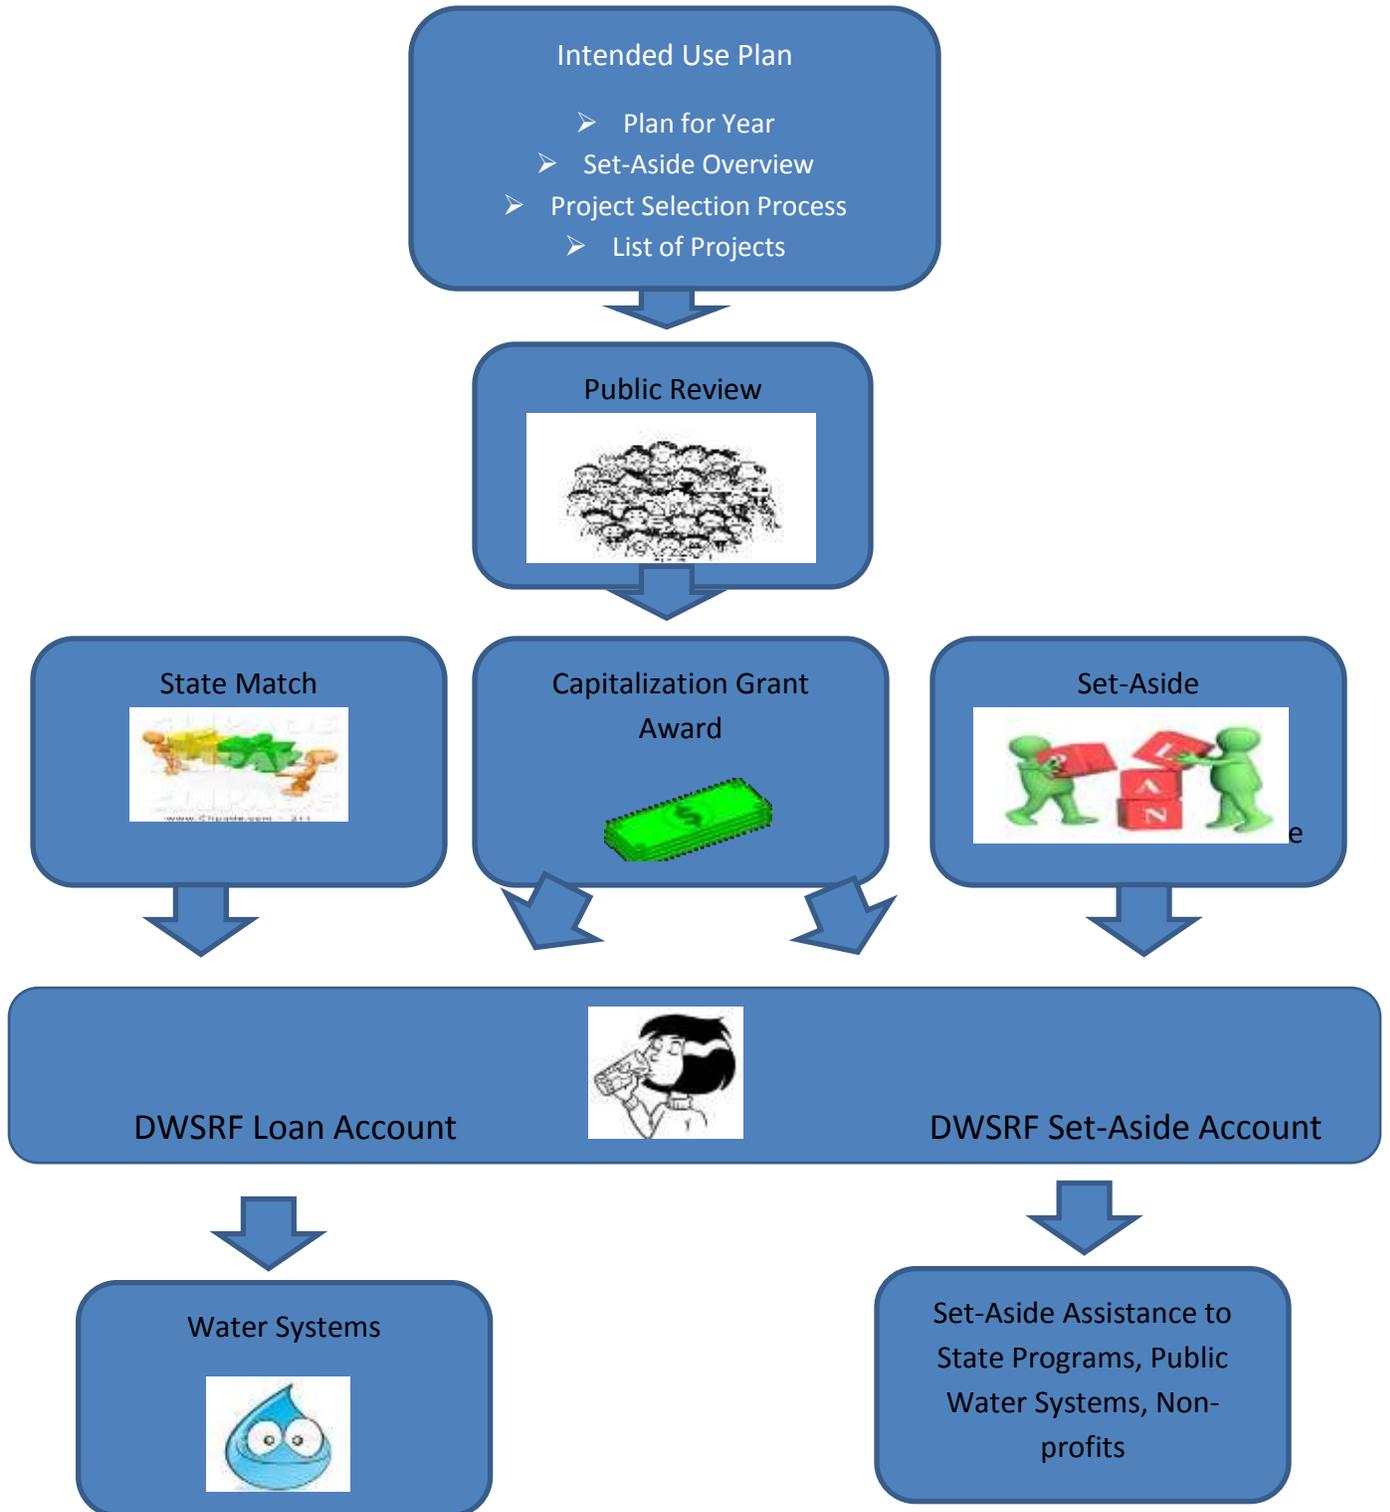

designated agency to apply for the capitalization grant for the DWSRF Program and related state funds. The Bureau of Safe Drinking Water (BSDW) and the Bureau of Water Pollution Control (BWPC) play an intricate part in the set-aside activities. The IUP reflects the priorities set by OFA, which administers the DWSRF program's construction loan program and assists in the administration of the set-aside activities.

In State Fiscal Year (SFY) 2015, the BSDW and BWPC will continue to focus on implementing the public health aspects of SDWA and the OFA will ensure the funds move expeditiously and responsibly from the time Nevada is awarded the capitalization grant to the time the funds are awarded to projects. These efforts are instrumental in achieving the requirements of the SDWA. The OFA and BSDW work closely together with other state and federal agencies to identify opportunities for funding specific projects and to coordinate funding efforts.

B. What's New for 2015

OFA will be focused on meeting the unliquidated obligations (ULO) Unliquidated Obligation reduction goals; and as such, will extend its outreach activities. A pamphlet introducing the program will be developed and will be sent out during the Priority List Solicitation of Projects. While OFA has always presented at the Nevada Rural Water Conference, this year a booth will be staffed to increase outreach. In addition, OFA will promote refinancing of SRF and, more importantly, outside loans.

1. **Figure 1: The DWSRF Funding Process**

II. STRUCTURE OF THE DWSRF

The DWSRF consists of two components that will be used to provide assistance to accomplish its goals.

A. Capital Planning, Design and Construction

Assistance will be provided for the planning, design, and construction of improvements to publicly and privately owned community water systems and nonprofit, non-community water systems for eligible public health projects. Eligible project types include treatment works, transmission and distribution, source, and storage projects. This account will consist of all federal funds used for infrastructure loan assistance, all state match funds, loan repayments, and interest earnings of the fund.

Federal DWSRF Guidelines specify projects that cannot be funded through the DWSRF. Of particular note are projects primarily intended to serve future growth. The focus of DWSRF assistance is to ensure safe drinking water for the current Nevada population. Eligible projects may be sized to accommodate for reasonable growth during the expected life of the infrastructure. However, the State will not fund projects intended to serve future growth outside of reasonable expectations and remains vigilant to ensure the limited DWSRF funds available are directed to serve the existing population. Additionally, the DWSRF may not provide assistance to any system that is in significant noncompliance with the National Primary Drinking Water Standards, unless it is determines that the project will enable the system to return to full compliance and the system will maintain an adequate level of technical, managerial, and financial (TMF) capability.

B. Set-Asides

The set-asides will be used to provide additional support for the core State drinking water programs and for activities to assist water systems in developing enhanced capabilities for the future. The set-asides help systems build capacity to assist in compliance with the SDWA and, if appropriate, aid their readiness to proceed to an infrastructure project. Additional information may be found in Section VI.

- ◆ **Administration** – support the state operation and management of the DWSRF, including provision of technical assistance to borrowers.
- ◆ **Small system technical assistance** – for assistance to small systems serving less than 10,000 people through the state personnel or agreements with third part assistance providers.
- ◆ **State program management** – for Public Water System Supervision program support, implementation of the Capacity Development and Operator Certification programs, and Source Water Protection program administration.
- ◆ **Local assistance and other state programs** – for assistance of Capacity Development and for source water protection activities.

III. DWSRF GOALS

In establishing the national Drinking Water State Revolving Fund program, Congress gave states the flexibility to design a program that can be tailored to meet the needs of local public water systems. The long- and short-term goals developed for the DWSRF are presented below. They provide a framework that will guide the decision-making in Nevada's DWSRF program.

A. Long-Term Goals

1. **Ensure that DWSRF funds are available in perpetuity to all Nevada public water systems to provide their customers with water that is safe and pleasant to drink all of the time.** NDEP will accomplish this by, when at all possible, addressing the most critical water issues of the state first, obligating funds as quickly as possible, and through effective and efficient management of the fund.
2. **Address the most serious risk to human health and comply with the requirements of the Safe Drinking Water Act.** Compliance is accomplished through the priority list ranking system.
3. **Coordinate funding with other funding agencies through the Infrastructure for Nevada's Communities.** The DWSRF program meets quarterly with other financing programs in Nevada, including the U.S. Department of Agriculture (USDA) Rural Development program, the Department of Housing and Urban Development's (HUD) Community Development Block Grant program and various state agencies. The programs meet to discuss program applicants and develop funding packages, which helps in maximizing cost savings.

B. Short-Term Goals

1. **Issue loans totaling at least \$30,790,734.** See Attachment B, Fundable List
2. **Use 20%-30% of the federal 2015 funds for additional subsidies.** See Attachment B, Fundable List
3. **Reduce ULO's through outreach activities and monitoring**
 - a. Brochures
 - b. Conference presentation and booth
 - c. Telephone calls
 - d. Refinancing
 - e. In order to draw the grant down more quickly, amend 2012 grant awards, transferring set-aside authority to loan funds and increase the 2014 grant set-asides to cover the shortfall in set-aside authority.
 - f. Cash flow model updated and reviewed no less than monthly

C. Public Health/Environmental Results Goals

OFA's DWSRF project loan funds and set-aside work plans contribute to achieving EPA's Strategic Goal 2, sub-objective 2.1.1 – *Water Safe to Drink: percentage of the population served by community water systems that receive drinking water that meets all applicable health-based drinking water standards through effective treatment and source water protection. Nevada's DWSRF program provides funding to help achieve this federal performance standard. The state will use the following performance measurers to track and manage the progress of the loan program in helping to achieve the federal standards:*

- ◆ *Set-aside funding for capacity development - One of our objectives for the set-asides is to build the TMF capacity of water systems and assure an understanding of the regulatory requirements to attain and remain in compliance with the SDWA. With the assistance of the BSDW, a quarterly report listing systems that may have*

compliance issues is given to the technical assistance provider so they may assist in returning systems to compliance before any targeted actions are necessary. Many of these issues include monitoring and reporting violations.

- ◆ *Funding utilization rate (cumulative loan agreement dollars compared with the cumulative funds available for projects) for the DWSRF loan fund. This will be calculated at the end of the state fiscal year (June 30, 2015). Nevada’s fund utilization rate is expected to meet national performance targets.*

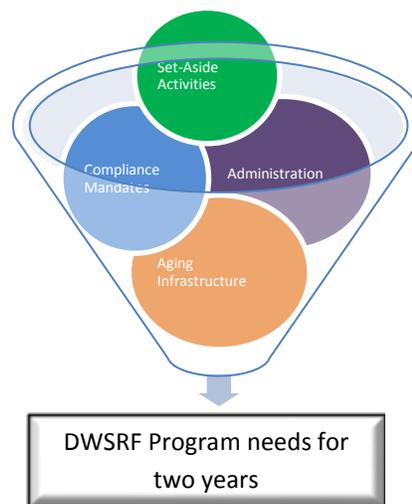

IV. CRITERIA AND METHOD FOR DISTRIBUTION OF FUNDS

A. Distribution of Funds Analysis

OFA conservatively estimates the needs of the systems within the state over a two year fiscal period. The needs of systems, however, vary widely. Some of the systems are concerned with future availability of water resources for current users in an arid desert entering another year of drought conditions. Other systems are concerned about infrastructure replacement of old or deteriorated infrastructure. OFA’s planning accounts for these challenges by having direct dialogue with water systems, engineers, and contractors that deal with these systems directly. Nevada is a small enough state to allow OFA to work with systems and understand which projects will be ready to proceed and meet the communities’ needs. This is done in conjunction with the preparation of the priority list. Once the office has determined the need, funding sources available to these systems and the likelihood they will come to the program for funding is determined. [Figure 2]

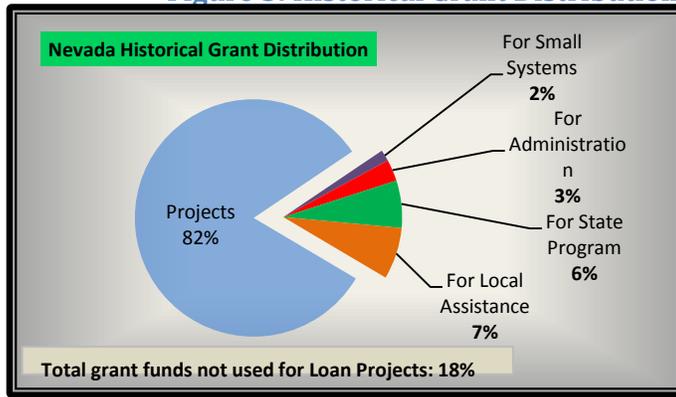

OFA examines the best approach to funding the system’s needs. Some systems are better funded through set-aside activities such as wellhead protection or small systems assistance. Other projects require direct loans from the program. It is from this analysis that the OFA determines its financial need. If plans change, OFA reserves, or banks, authority in set-aside funding to move money to project loans. This is done to ensure the Program has enough funding in the future, should the need to fund more set-aside activities arise. Historically, Nevada has not requested its full authority on set-aside funds [Figure 3]. See also Attachment E, Schedule of Banked Authority.

Figure 3

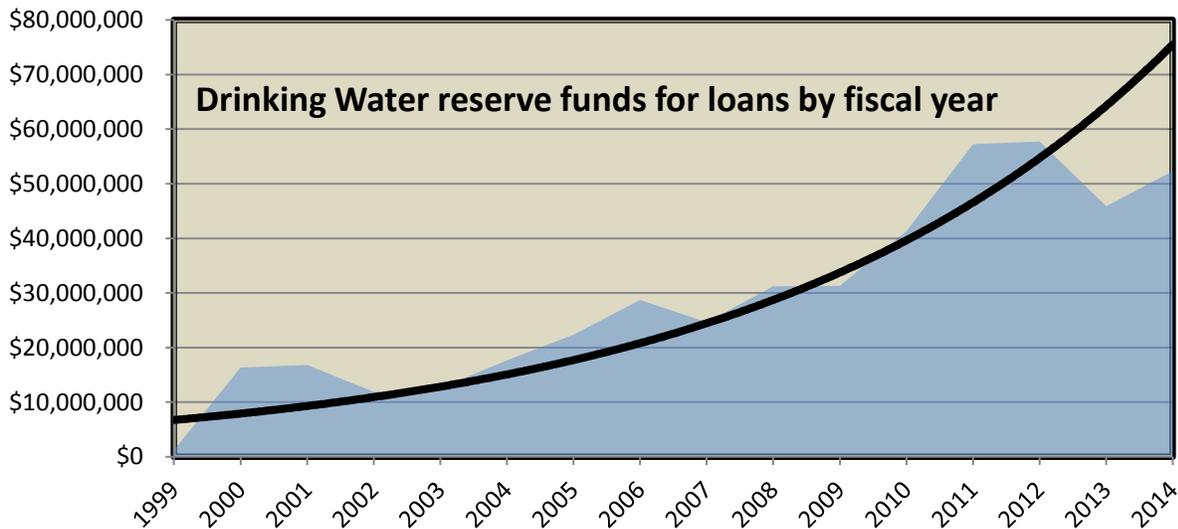

1. Figure 2: Two

Figure 3: Historical Grant Distribution

OFA considers the needs of our water systems and the health and safety of the citizens of Nevada its first priority. To ensure the Program is available to assist with this goal, OFA also analyzes the health of the program and availability of funds in perpetuity. The methodology OFA employs to determine its funding level, in other words funding available for loans, has ensured that current needs are being met along with long term growth of

the fund. [Figure 4]. The trend line in Figure 4 also illustrates gradual increase of funding.

2. Figure 4: Growth of Reserve Funds for loans by fiscal year

B. Disadvantaged Community Program

The federal 2015 appropriation requires that the state use at least 20% and up to 30% of its grant to provide additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants or any combination of these. Under the existing program, the DWSRF has authority to offer principal forgiveness and negative interest loans in an amount up to 100% of the value of a loan to communities that could not otherwise afford a loan; consolidation projects; and if need be, projects with populations under 10,000.

The Nevada Administrative Code defines a disadvantaged community as an area served by a public water system in which the average income per household is less than 80

percent of the median household income of the state. To meet the Federal 2015 appropriation requirement, additional subsidy will first be offered to communities that meet the definition of a disadvantaged community. If the minimum grant amount for additional subsidization is not met through addressing health concerns, projects with critical infrastructure needs where the community meets the definition of disadvantaged will be considered. In addition, to promote sustainability, projects that connect smaller systems with larger systems will be considered. It is possible that some of the projects on the Priority List meeting the above affordability criteria will not utilize SRF funds. If necessary to meet the 20% of the grant in additional subsidization requirement, the eligibility for additional subsidy will be expanded to include all communities with a population less than 10,000 people.

All subsidy projects will be limited to \$500,000 in subsidy dollars unless there is an acute health risk.

There are adequate projects on the Priority List that meet the above affordability criteria to more than satisfy the requirement of 20% to 30% of the grant. The terms and amount of the additional subsidy will be determined on a case by case basis based on the individual community's financial situation.

In addition to reduced or zero interest loans for disadvantaged communities, the project prioritization process takes into account the median household income (MHI) in the area served by a water system. The process ranks projects in communities with a lower MHI higher than an equivalent project in a community with a higher MHI. This ranking process, therefore, gives those projects serving communities with a lower MHI the first opportunity at loan funds.

C. Small System Funding

Following completion of the ranking process, the fundable list of projects is reviewed to determine if at least 15 percent of the projected funding amount will be for public water systems that regularly serve fewer than 10,000 people, as required by the SDWA. Since a minimum of 78 percent of our applicants are small systems, the state does not anticipate having problems meeting this benchmark. Based on the fundable list developed, we anticipate that more than 44 percent of the SFY 2015 loan funds will be used by small water systems.

D. Capacity Assessment

The SDWA requires that a public water system applying for a DWSRF loan must show that it has the TMF capacity to ensure compliance and system sustainability. If a system does not have adequate capacity, assistance may only be provided if it will ensure that the system acquires adequate capacity. The goal of this requirement is to ensure that DWSRF assistance is not used to create or support non-viable systems. Nevada's TMF Capacity Survey is filled out as part of the DWSRF loan application process if a system has not gone through a capacity survey in the past 5 years. The state will use the TMF capacity survey and will also consider the results of sanitary surveys and Enforcement

Targeting Tool (ETT) score when assessing capacity.

1. Technical Capacity

To demonstrate technical capacity, DWSRF loan applicants must show that drinking water sources are adequate, that the system's source, treatment, distribution, and storage infrastructure are adequate and that personnel have the technical knowledge to efficiently operate and maintain the system. As part of reviewing a loan applicant's TMF Capacity Survey, OFA reviews the system's records to assure that the system is being properly operated and maintained. The water system must not have outstanding water compliance problems unless the DWSRF project is intended to correct those problems. The engineering reports, plans, and specifications for the proposed DWSRF-funded project and the system's technical capacity from the TMF capacity survey will all be evaluated during the loan application process. The water system must have a qualified water operator in accordance with the state's operator certification program.

2. Financial Capacity

To demonstrate financial capacity, the applicant must show that the system has sufficient revenues to cover necessary costs and demonstrate credit worthiness and adequate fiscal controls. OFA reviews the applicant's financial capacity from the TMF capacity survey, the project budget, annual financial reports, and other financial information to ensure adequate financial capacity of the applicant.

3. Managerial Capacity

To demonstrate managerial capacity, the water system must have personnel with expertise to manage the entire water system operation. OFA reviews the applicant's managerial capacity from the TMF capacity survey and supporting documentation to assure that management is involved in the day to day supervision of the water system, is responsive to all regulations, is available to respond to emergencies and is capable of identifying and addressing all necessary capital improvements and assuring financial viability.

4. Long-Term Capacity

OFA assesses whether each water system has a long-term plan to undertake feasible and appropriate changes in operations necessary to develop adequate capacity. In making these assessments, the OFA will consult with the Nevada Division of Environmental Protection's Bureau of Safe Drinking Water and local health departments and review water resource management strategies, comprehensive studies, the State's response to the Drinking Water Needs Survey and other available engineering reports in an effort to improve the overall capacity of systems requesting assistance. The OFA will encourage consolidation efforts when two or more systems can benefit and also encourage other options, such as contract management or partnerships with other communities in their area. The priority ranking criteria provides additional points to encourage this objective.

E. Establishing Project Priority

Nevada uses a ranking system to prioritize the order in which eligible projects will be financed (NAC 445A.67566 to NAC 445A.67574, inclusive). In general, priority is given to projects that facilitate compliance with national primary drinking water regulations applicable to the public water system under Section 1412 of the SDWA. Priority is also given to those projects which otherwise significantly further the health protection objectives of Section 1452 of the SDWA and for public water systems most in need on a per capita basis. The priority ranking system, described generally below, is described in detail in NAC 445A.67569. Projects are ranked into the following four classes, listed in order of priority.

1. Significant health risks;
2. Primary and secondary drinking water standards;
3. Infrastructure replacement; and
4. Refinance of existing debt.

Points assigned, as specified in NAC 445A.67569, to address different problems within a class are additive. The initial ranking number is multiplied by the ratio of the State MHI to the public water system MHI. Within each of the above categories, the projects are ranked by type of public water system in the following order:

1. Community public water systems;
2. Non-profit, non-transient, non-community water systems;
3. Non-profit, transient, non-community water system;

On an annual basis, following a statewide solicitation for projects, the Division develops a statewide priority list of water projects. Placement on the priority list does not guarantee that a project will be funded. However, only those projects that are included on the priority list will be considered for possible funding. The IUP, including the list of projects, undergoes a public review and comment process at least once each year.

The Division may revise the ranking of a project on an existing list at any time if information affecting the ranking of the project becomes available that was not available at the time the list was developed. Any revised list, before it is adopted, must undergo the public review and comment process outlined in the regulations and must be approved by the Board for Financing Water Projects. The Division may, without obtaining the approval of the Board for Financing Water Projects or holding a public participation workshop, revise a priority list to correct minor typographical or technical errors.

Requests for financial assistance for emergency situations may be made to the Division at any time. In any emergency situation, an applicant may submit a loan application without waiting for a revision to the priority list. All other applicants on an approved priority list will be notified of an emergency request and be given an opportunity for any comments or objections. The Board for Financing will add the project to the priority list at the same time the Board approves the loan commitment.

EPA Guidance ordinarily requires identifying a fundable list of projects. The fundable list included in Attachment B was developed based on a readiness to proceed.

A list of projects in order of priority that may receive assistance from the account for the revolving fund is made a part of this IUP (See Attachment A). At the end of each calendar year, NDEP sends out a solicitation to all community and non-transient, non-community water systems for proposed water projects. In late December 2014, NDEP sent out a solicitation letter for the 2015 Priority List. The Division held a Priority List Workshop on May 21, 2014 for review of the 2015 Priority List. The Board for Financing Water Projects approved the 2016 Priority List at their meeting on April 28, 2015. The fundable list for 2016 is included in Attachment B. The Resolution of the Board for Financing Water Projects approving the 2016 Priority List effective April 28, 2015 is included in Attachment A. Although the 2016 Priority List is presented in this IUP, due to timing differences some projects applied to the 2015 grant may be derived from prior or future year Priority Lists.

F. Tie Breaking Procedure

If the scores for two or more projects are tied, ranking will be based on population, with the higher population given the higher ranking.

G. Bypass Procedures/Readiness to proceed

Eligible projects on the priority list may be bypassed if the applicant withdraws a project, requests that action be deferred, fails to meet submittal deadlines, or is not ready to proceed as determined by the Division. The projects that are bypassed will be provided notice by the Division and have an opportunity for objection.

H. Refinancing Existing Loans

The DWSRF may be used to buy or refinance debt obligations for DWSRF projects. The long-term debt must have been incurred after July 1, 1993, to be eligible for refinancing. Projects will still have to meet current SRF requirements and conduct an Environment Review. Loans solely for the purchase of land will not be refinanced.

V. FINANCIAL MANAGEMENT

A. Sources and Uses of Funds

1. State Match Source

The SDWA requires states to provide a 20 percent match to the capitalization grants received from the federal government. This requirement is met through the issuance of Government Obligation Bonds. OFA intends to issuance bonds in late fall of 2015 totaling approximately \$6.7 million, meeting the required match through the 2017

grant award. No funds will be drawn from these grants until the match funds have been deposited. Please see Table 1 for further detail.

2. Fee Income

While Nevada's has statutory authority to charge a fee, it has chosen not to in the past and does not plan to do so in SFY2015.

3. Leveraging

States may issue bonds through the DWSRF program using the federal capitalization grant as security to provide for higher funding levels in the current year of the program. Leveraging of federal funds is a useful financial option available to states with a high demand of shovel ready projects for immediate DWSRF funding. The program has never taken advantage of leveraging but reserves the right if funding demands increase.

4. Use of All Funds Available

Since the program's inception, the DWSRF has closed 84 loans (a total of \$180.8 million). The amount of funds in the DWSRF for SFY 2015-including the FFY 2015 grant, repayments, and interest earnings-and the intended allocation to each activity is presented in Table 1. SFY 2015 funding will total \$32 million. The DWSRF will provide \$30.8 million in loans and loan refinancing to public and private water systems and \$2,675,000 for set-aside program activities including \$375,000 to administer the program. All infrastructure projects will be funded through the current capitalization grants, repayment funds, a bond funds (match), and investment interest. The funding available for SFY 2015 loans for systems serving more than 10,000 people is \$12,600,000 (41 percent of the total loan funding). Systems serving fewer than 10,000 people will receive \$18,190,734 (59 percent of the total loan funding). The interest rate for all traditional loans will be 62.5% of the Bond Buyers Index at the time of the loan.

Per Congress' FY2015 DWSRF funding legislation, no less than 20 percent and no more than 30 percent of the FY 2015 capitalization grant must be used towards additional subsidy in the form of principal forgiveness, negative interest loans or grants. OFA will provide approximately \$2.9 million, or 20 percent of the appropriation, in the form of principal forgiveness. This approach balances the State's desire to provide subsidy in a time of economic hardship in many of our communities, while continuing to maintain the DWSRF fund in perpetuity.

1. **TABLE 1: DWSRF Sources and Uses**

Estimated FY2015 and Cumulative Sources and Uses			
	Cumulative Total from 1998 through 2014 Grants	*2015 Fiscal Year	Cumulative Total through 2014 Grant
SOURCES			
Federal Capitalization Grants	161,086,500	12,614,000	173,700,500
ARRA Capitalization Grant	19,500,000		19,500,000
State Match			0
Provided from State Match Bond Issues	33,196,598	6,700,000	39,896,598

B. Financial Terms of Loans

1. Standard Loans

The SDWA allows states to charge interest rates ranging from zero percent to market rate for standard DWSRF loans. We have determined that the interest rate on a DWSRF loan should reflect current market conditions. Interest rates are set 62.5% of the General Obligations Bond Index or the Revenue Bond Index rate at the time of the loan award. All loans will have a maximum repayment term of 20 years with fixed interest rates. Repayment of loans will commence no later than one year after project completion.

2. Disadvantaged Community Loans

The federal 2015 appropriation required that the state use at least 20% and up to 30% of its grant to provide additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants or any combination of these. Under the existing program, the DWSRF has authority to offer principal forgiveness and negative interest loans in an amount up to 100% of the value of a loan to communities that could not otherwise afford a loan; consolidation projects; and if need be, projects with populations under 10,000.

The Nevada Administrative Code defines a disadvantaged community as an area served by a public water system in which the average income per household is

less than 80 percent of the median household income of the state. To meet the Federal 2015 appropriation requirement, additional subsidy will first be offered to communities that meet the definition of a disadvantaged community. If the minimum grant amount for additional subsidization is not met through addressing health concerns, projects with critical infrastructure needs where the community meets the definition of disadvantaged will be considered. In addition, to promote sustainability, projects that connect smaller systems with larger systems will be considered. It is possible that some of the projects on the Priority List meeting the above affordability criteria will not utilize SRF funds. If necessary to meet the 20% of the grant in additional subsidization requirement, the eligibility for additional subsidy will be expanded to include all communities with a population less than 10,000 people.

All subsidy projects will be limited to \$500,000 in subsidy dollars unless there is an acute health risk.

There are adequate projects on the Priority List that meet the above affordability criteria to more than satisfy the requirement of 20% to 30% of the grant. The terms and amount of the additional subsidy will be determined on a case by case basis based on the individual community's financial situation.

In addition to reduced or zero interest loans for disadvantaged communities, the project prioritization process takes into account the median household income (MHI) in the area served by a water system. The process ranks projects in communities with a lower MHI higher than an equivalent project in a community with a higher MHI. This ranking process, therefore, gives those projects serving communities with a lower MHI the first opportunity at loan funds.

C. Loan Disbursements

NDEP has disbursed \$180.8 million for water projects since the program's inception. Match is spent first, federal funds second, and then reloan dollars are spent. Grant funds are drawn used the first in first out method, with the oldest grant funds being drawn first. Please note, NDEP does not use state funds for principal forgiveness loans and/or private systems so there may be a small balance of federal moneys available when reloan funds are drawn.

D. DWSRF-CWSRF Fund Transfers

NDEP reserves the right to transfer up to 33 percent of DWSRF capitalization grant to the CWSRF or an equivalent amount from the DWSRF to the DWSRF. Since program inception no funds have been transferred.

VI. SET-ASIDE ACTIVITIES

- A. The SDWA allows each state to set aside up to 31 percent of its federal capitalization grant to support various drinking water projects including administration, technical assistance, state program management and special activities. The funding request is based on the State biannual budget.

For FY 2015, a total of \$2.675 million of federal funding (21.21 percent of the federal FY 2015 funding) for set-asides is planned. An additional \$950,000 of state funding in the form of in-kind will be allocated to meet the 1:1 march mandate of the State Program Management set-aside. Detailed workplans have been submitted to EPA and reporting on the performance status of the activity will be reported on a semi-annual basis. For further detail on the set-asides please see Attachment D.

1. DWSRF Administration

Max allowed:	4%
Taken from FFY 2015 Grant:	2.97% (\$375,000)

The DWSRF is administered by OFA. The administration set-aside is used to pay salaries and associated expenses of program personnel devoting time to the administration of the DWSRF loan account. Part of this account is also used to pay for of a contracted Financial Advisor, who assists in fund analysis and bond issuances. Administration set-aside funds are also used to procure all equipment and training necessary for the adequate performance of the staff.

2. Small Systems Technical Assistance

Max Allowed:	2%
Taken from FFY 2015 Grant:	1.19% (\$150,000)

These funds are used to provide technical assistance to public water supplies serving 10,000 or fewer people. OFA uses this set-aside to fund assistance providers that may include the Nevada Rural Water Association (NvRWA). NvRWA will be under contract to provide specific activities such as the following:

- ◆ Assist with compliance issues, sanitary survey deficiencies, loan & grant assistance, emergency assistance
- ◆ Water conservation, O&M manuals, cross connection control, emergency response, wellhead protection, hydraulic modeling
- ◆ Budgeting & rate setting, power consumption, digital mapping, general office & business practices

3. State Program Management

Max Allowed:	10%
Taken from FFY 2015 Grant:	7.53% (950,000)

These funds are used to address additional program requirements of the Public Water System Supervision program outlined by the SDWA and administer or provide technical assistance

through source water protection programs. This set-aside requires a one-to-one state match beyond the 20 percent state match for federal capitalization grants. The NDEP uses activities through the Bureau of Water Pollution as an in-kind match in the amount of \$711,871 with the 1993 expenditure credit of \$238,129 making up the remainder of the match requirement.

A. PWSS Program

NDEP through the Bureau of Safe Drinking Water (BSDW) continues to maintain the Safe Drinking Water Information System (SDWIS) for use in managing Nevada PWS's and will integrate SDWIS with other Bureau workflow management tools and other State databases as appropriate. BSDW continues to manage State and US EPA compliance and enforcement priorities using Enforcement Targeting Tool information, pursuing enforcement as warranted and track ongoing compliance with Administrative Orders issued for noncompliance. In addition, the BSDW maintains engineering design review activities.

B. Operator Certification

NDEP conducts a water system operator certification program. To comply with the SDWA requirements and ensure the resources to certify operators of all community systems and non-transient non-community systems (including systems without treatment), set-aside funding will be used to continue our operator training contract to fund salaries for administrative and enforcement personnel.

NDEP's operator certification program meets the criteria that have been presented by EPA in stakeholder meetings and guidance.

C. Capacity Development

The primary goal of our capacity development program is to provide public water systems with the tools and financial assistance needed to obtain and maintain the technical, financial and managerial capacity needed to ensure a supply of safe drinking water. The NDEP implements the state's capacity development program (http://ndep.nv.gov.bffwp/dwsrf1_cap_dev.htm). The capacity development efforts are conducted by the OFA, BSDW, and NvRWA. The program is funded primarily with set-aside monies from the DWSRF. In developing and implementing this program, the NDEP accomplishes tasks in new systems program annual reporting criteria and existing system strategies.

D. Source Water Protection Program Administration

FFY 2015 Grant/State Matching Funds:

Source water protection is a cost-effective strategy that focuses on preventing contamination of drinking water supplies. Funding under this set-aside is used to revise and implement source water protection programs, to develop and perform technical assistance outreach and to develop a strategy for dealing with threats including pathogens, inorganics and nutrients.

In SFY 2015, NDEP will work to further integrate its state-side source water protection strategy with other federal, state and local programs leading to improved protection and management of its water resources. NDEP continues to encourage public support and responsibility for local water supplies by supporting citizen advisory committees to help in the implementation of NDEP's existing source water protection program.

A. Local Assistance and Other State Programs

Max Allowed:	15%
Taken from FFY 2015 Grant:	9.51% (\$1,200,000)

Funds for this set-aside are used to support the implementation of local drinking water protection initiatives, including evaluating regional solutions, conducting sustainability audits and land acquisition for source water protection. Federal regulations state that no more than 10 percent of the federal capitalization grant can be allotted to any one of these activities.

- a. Wellhead Protection – Source Water Protection/Groundwater
Implement the comprehensive Source Water Protection Program by providing outreach and assistance communities with strategies to protect their local water resources by preventing contamination of ground water and surface water, identifying and reducing the risk posed by potential water pollution sources through various state and local program and coordinating water protection activities throughout the state. Utilize information gathered in the assessment program to implement the vulnerability assessment and monitoring waiver program.
- b. Capacity Development
In addition to the capacity development activities listed under the 10 percent State Program Management set-aside, NDEP uses funds under the Local Assistance set-aside to provide assistance and training to improve PWS technical, managerial and financial capacity.

VII. PUBLIC PARTICIPATION

A. Board for Financing Water Projects

NDEP is committed to involving public stakeholders in the development and ongoing operation of our program. A five-member board appointed by the Governor consisting of outside Professional Engineers and representatives from public water systems help in the development of the DWSRF program policy and approval of proposed eligible projects. In the future, our Board members will continue as a source of public input on DWSRF management and operations.

B. Public Meetings and Comment Activities

To ensure that the public had an opportunity to review our proposed plans for the DWSRF, the draft IUP was posted on our website (<http://ndep.nv.gov/bffwp/srlf01.htm>) for 30 days before it was finalized. A public workshop to solicit public comment for the 2015 Priority List was held May 21, 2014. A subsequent workshop was held August 26, 2014 to add projects to the Priority List with approved by the Board on September 26, 2014. A third workshop was held on Monday, April 27th to establish the 2016 Priority List. The 2016 priority list was approved by the Board on Tuesday, April 28, 2015 and immediately went into effect.

VIII. AUDITS AND REPORTING

Ensuring transparency and accountability, all program materials are posted on our website (<http://ndep.nv.gov/bffwp/index.htm>). The State Controller's Office annually utilizes the services of an independent audit to ensure financial integrity. Project and benefits data is entered into the EPA Drinking Water National Information Management System (NIMS) and Project and Benefits Reporting (PBR) System to evaluate the benefits of the DWSRF program. Among other parameters, the reporting systems evaluate the number of DWSRF projects that provide the following public health benefits:

- i. Achieve compliance with SDWA;
- ii. Maintain compliance with SDWA; and
- iii. Meet future requirements of SDWA.

Project benefits information is entered into PBR by the end of the quarter in which the assistance agreement is signed. GPR is not being continued, so "green" projects and/or green portions of projects are not reported in PBR.

Attachment A: 2015 Project Priority List

DRAFT FINAL Year 2015 Priority List - Drinking Water State Revolving Fund

Rank	Water System	Total Points	State MHI/ PWS MHI	Revised Points	Ownership of System	County	ID#	Pop. Served	Number of Svc. Com.	Project Description	Amount

**Attachment D: Nevada FY14-15 Safe Drinking Water Act
Integrated Workplan**

<p style="text-align: center;">Nevada SFY 14-15 Safe Drinking Water Act Integrated Workplan Drinking Water State Revolving Fund (DWSRF) Set-aside Workplan July 1, 2013 through June 30, 2015</p>					
Part II					
Task TA: 2% Small System Technical Assistance Set-aside					
<p>Activity: Provide Technical Assistance to Small Public Water Systems</p> <p>Outcome: Offer technical assistance to all small water systems</p> <p style="text-align: right;">Output: Annual Progress Report, Names of Systems & Assistance Provided</p>					
ID	Responsibility	Activity Description	Start	Finish	Workplan Comments / Annual Report
TA - A.1	NvRWA	NDEP Related: assistance with compliance issues, sanitary survey deficiencies, loan & grant assistance, emergency assistance	1-Jul-13	30-Jun-15	
TA - A.2	NvRWA	Planning / Plan Implementation: water conservation, O&M manuals, cross connection control, emergency response, wellhead protection, hydraulic modeling	1-Jul-13	30-Jun-15	
TA - A.3	NvRWA	General Managerial: Budgeting & rate setting, power consumption, digital mapping, general office & business practices	1-Jul-13	30-Jun-15	
Task Adm: 4% Administration Set-aside					
<p>Activity: Administer the DWSRF Program</p> <p>Outcome: Effectively manage a self-sustaining DWSRF Loan Program and ensure that funds are available in perpetuity.</p> <p style="text-align: right;">Output: Annual Progress Report, Grant Application Apr, IUP May, NMS Aug & Annual Report Dec</p>					
ID	Responsibility	Activity Description	Start	Finish	Workplan Comments / Annual Report
Adm10	OFA	Annual Priority List: solicit projects, draft priority list, public participation, BFWP approval	Dec	July	
Adm20	OFA/BSDW	IUP: draft IUP, public participation, finalize IUP	Apr	Jun	
Adm30	OFA	EPA Grant: prepare grant application & submit to EPA, receive EPA grant award	April	Jul	
Adm40	OFA	Biennial Workplan	1-Jul-13	30-Sep-13	
Adm50	OFA	Revise Workplan	as needed	as needed	
Adm60	OFA	Disadvantaged communities - additional subsidy	1-Jul-13	30-Jun-15	
Adm70	OFA	Attend Conferences & Seminars including CIFA	ongoing	ongoing	
Adm80	OFA	Annual DWSRF Report	1-Sep	30-Dec	
Adm90	OFA	Single Audit	Sep	Sep	
Adm100	OFA	FFR	ongoing	ongoing	
Adm110	OFA	Annual Capacity Report	1-Jul	15-Sep	
Adm120	OFA	PBR	ongoing	ongoing	
Adm130	OFA	NIMS Report	1-Aug	31-Aug	
Adm140	OFA	FFATA Report	ongoing	ongoing	
Adm150	OFA	LGTS Database Upgrades	1-Jul-13	30-Jun-15	

Task PM: 10% Program Management Set-aside					
Activity 1: Public Water System Supervision Program (PWSS) Outcome 1: Maintain the Safe Drinking Water Information System (SDWIS) for use in managing Nevada PWSs; Integrate SDWIS with other Bureau workflow management tools and other State databases as appropriate; Continue to manage State and US EPA compliance and enforcement priorities using Enforcement Targeting Tool information, pursue enforcement as warranted and track ongoing compliance with Administrative Orders issued for non-compliance; Maintain operator certification program; and Maintain engineering design review activities			Output: PWSS Semiannual Progress Report Part II (a continuation of the PWSS Part I Semiannual Progress Report - Mid-Year and End-of-Year)		
ID	Responsibility	Activity Description	Start	Finish	Workplan Comments / Semiannual Report
PWS10spm	BSDW	Support activities in PWSS program to ensure compliance with SDWA requirements	1-Jul-13	30-Jun-15	
PWS20spm	BSDW	Participate in EPA/State/Association workshops	1-Jul-13	30-Jun-15	
PWS30spm	BSDW	Reserved for any Part A - PWSS workplan Task A through E funded by the DWSRF Set-aside on a permanent basis.	1-Jul-13	30-Jun-15	
PWS40spm	BSDW	Revise PWSS Sections of the IUP	May	May	
SDWIS10spm	BSDW	Enter monitoring data into SDWIS	ongoing	ongoing	
SDWIS20spm	BSDW	Enter violations into SDWIS	ongoing	ongoing	
SDWIS30spm	BSDW	Report inventory updates, violations and enforcement actions to SDWIS quarterly	1-Jul-13	30-Jun-15	
OC10spm	BSDW	Implement operator certification program	1-Jul-13	30-Jun-15	
OC20spm	BSDW	Support Operator Certification Forum	1-Jul-13	30-Jun-15	
OC30spm	BSDW	Provide water distribution and treatment operator certification exams for levels 1 through 4 at least 2 times per year	1-Jul-13	30-Jun-15	
OC40spm	BSDW	Prepare Operator Certification Program Annual Report	Aug	Aug	
Activity 2: Capacity Development Strategy Outcome 2: Nevada's Capacity Development Strategy.			Output: Annual Report & Triennial Report to Governor		
ID	Responsibility	Activity Description	Start	Finish	Workplan Comments / Annual Report
CD10spm	OFA, BSDW	Continue to evaluate Capacity Development Strategy	1-Jul-13	30-Jun-15	
CD20spm	OFA/ BSDW	Participate in the State-EPA Re-Energizing Capacity Development Work group; and promote participation of NDEP OFA and BSDW staff on activities under that umbrella	1-Jul-13	30-Jun-15	
CD30spm	OFA/ BSDW/ BWPC	EPA Admin. & Governor Report / every 3 years	1-Jul-14	30-Sep-14	

TASKLA: 15% SET-ASIDE: LOCAL ASSISTANCE AND OTHER STATE PROGRAMS

Activity 1: Wellhead Protection - Source Water Protection/Groundwater
Outcome 1: Implement the comprehensive Source Water Protection Program by providing outreach and assistance to local communities on strategies to protect their local water resources by preventing contamination of ground water and surface water, identifying and reducing the risk posed by potential water pollution sources through various state and local programs, and coordinating water protection activities throughout the state. Utilize information gathered in the assessment program to implement the vulnerability assessment and monitoring waiver programs.

Output: Annual Progress Report, List of communities awarded technical assistance, work plan goals and outcomes, start-end dates, and project status.

ID	Responsibility	Activity Description	Start	Finish	Workplan Comments /Annual Report
SWP10osp	BWPC/BSDW	BWPC & BSDW collaborate to define future data needs and source water protection program activities	1-Jul-13	30-Jun-15	
SWP20osp	BSDW	Provide Vulnerability Assessment Reports as needed to water systems, as related to informational statements required in Consumer Confidence Reports.	1-Jul-13	30-Jun-15	
SWP30osp	BSDW	New source water delineations and field contaminant source updates as needed; field observations and/or data collection may be conducted during Sanitary Survey inspections or specific travel for that purpose.	1-Jul-13	30-Jun-15	
SWP40osp	BSDW	Evaluate water quality, risk, time of travel, susceptibility and other relevant information to determine source vulnerability; purchase appropriate software for this purpose as determined necessary by BSDW.	1-Jul-13	30-Jun-15	
SWP50osp	BSDW	Update groundwater monitoring schedules and waivers	1-Jul-13	30-Jun-15	
SWP60osp	BSDW	Utilize SDWIS to aid in source water protection evaluations and program decisions. If/when determined necessary by the BSDW, upgrade SDWIS software to enhance program capabilities.	1-Jul-13	30-Jun-15	
SWP70osp	BSDW	Encourage water systems to engage in source water protection efforts	1-Jul-13	30-Jun-15	
WHP10osp	BWPC	Enhance State SWP/WHP Program and develop strategies for carrying out the programs and protecting public drinking water supplies and ground water resources	1-Jul-13	30-Jun-15	
WHP20osp	BWPC	Provide technical assistance with the development and implementation of community/public water system source water/wellhead protection plans; and encourage these activities at the local level.	1-Jul-13	30-Jun-15	
WHP30osp	BWPC	Encourage coordination among federal, state and local agencies and other community groups involved with source water and wellhead protection activities.	1-Jul-13	30-Jun-15	
WHP40osp	BWPC	Develop technical guidance for water pollution prevention activities and best management practices.	1-Jul-13	30-Jun-15	
WHP50osp	BWPC	Develop educational outreach materials and coordinate educational outreach activities.	1-Jul-13	30-Jun-15	
WHP60osp	BWPC	Develop and enhance source water/wellhead protection data management and coordinate data sharing.	1-Jul-13	30-Jun-15	
WHP70osp	BWPC	Maintain/enhance staff technical capabilities	1-Jul-13	30-Jun-15	

TASKLA: 15% SET-ASIDE: LOCAL ASSISTANCE AND OTHER STATE PROGRAMS (continued)

Activity 2: Capacity Development
Outcome 2: Provide assistance and training to improve PWS technical, managerial and financial capacity.

Output: Annual Progress Report, Names of Systems and Assistance Provided

ID	Responsibility	Activity Description	Start	Finish	Workplan Comments / Annual Report
TA - B	NvRWA	Training/Mentoring: water technology courses, board & staff training, operator training, annual conference & training scholarships	1-Jul-13	30-Jun-15	
TA - C	NvRWA	Distance Training: technical e-learning / videoconferencing	1-Jul-13	30-Jun-15	
Admin160	OFA	Water Lines Publication	quarterly	quarterly	
CD40osp	NDEP, NvRWA	Provide TMF technical assistance to PWS	1-Jul-13	30-Jun-15	

NDEP = Nevada Division of Environmental Protection
 BWPC = Bureau of Water Pollution Control
 BSDW = Bureau of Safe Drinking Water
 OFA = Office of Financial Assistance
 NVRWA = Nevada Rural Water Association
