Notes:

1. Contours represent topographic surface in feet above mean sea level. Contour interval = 1 foot. Major contour interval = 5 feet. Contours provided by Las Vegas Paving.

2. Source of pre-remediation topographic information shown is from an aerial survey performed by PBS&J on behalf of Basic Remediation Company (BRC) on January 17, 2008, supplemented with survey data obtained from LVP prior to initiating remediation activities.

OCPs	Alpha BHC (Alpha Hexachlorocyclohexane)	0.399	mg/kg
OCPs	Heptachlor	0.426	mg/kg
OCPs	P,P'-DDE	8	mg/kg

mg/kg= milligram per kilogram
ug/kg= microgram per kilogram
ppt= parts per trillion
-- = sample not analyzed for listed analyte

Qualifiers:
J Estimated value. It is not possible to assess the direction of the potential bias.
J+ Estimated value with a positive bias.
J- Estimated value with a negative bias.

Notes:
1. Excavation depths are listed in feet below ground surface at time of sampling.
2. Results in databoxes are shown in units listed in above table.
3. Bolded results exceed the NDEP Basic Comparison Level (BCL) or site-specific action level (arsenic, Dioxin TEQ, benzo(a)pyrene TEQ). For comparative purposes, results for those analytes that comprise the majority of BCL exceedances at the site (i.e., Dioxin TEQ, perchlorate, arsenic, magnesium, lead, hexachlorobenzene, benzo(a)pyrene, and benzo(a)pyrene TEQ) but were detected at concentrations less than their respective BCL/ action level have also been included, but are not bolded.
