

## Solid Waste Online Disposal Data Reporting

The following instructions are intended to assist you in on-line data reporting. Our new process allows each landfill to input their required disposal data into the State Solid Waste Database. Each landfill, whether they report quarterly, semi-annual or annual will be able to, create a report and input their data directly into our database. The data will be available to review/print the report history for a facility. NDEP will check the on-line inputs at the end of each reporting period to ensure that all facility disposal data has been entered. As a reminder, disposal reports must be submitted or inputted within 30 days after the end of the reporting period.

To start the on-line reporting process access our data submittal page at the following link: <http://ndep.nv.gov/bwm/submitdisposal/>. This link can also be found in the 'Landfill' section on our [Forms & Guidance Documents](#) page. These links can be set as a favorite to simplify the process for multiple users on-site. As expected, the process starts with the login page and below is a screen shot of that page.

*Solid Waste Disposal Report system is intended for official use only. Unauthorized access or use of this computer system may subject violators to criminal, civil, and/or administrative action. Access or use of this computer system by any person, whether authorized or unauthorized, constitutes consent to these terms.*

The first time you login you'll use the default initial username and password:

Initial Username – newaccount

Initial Password – newaccount

This will take you to the account profile page (see below) where your pertinent general information will be input. The email address used should be accessible to everyone that will be inputting data for your facility. This email address will also be used should the unthinkable happen and you forget the username and/or password. It would be advisable to document and secure the pertinent information, such as the username, password, email address and the answers to the security questions, which can also be handy if you have multiple users.
