RE: Permit Application for North Valmy Generating Station  
Landfill Modification and Lateral Expansion – Permit No. SW174R01

Dear Mr. Taylor:

In response to your email dated September 12, 2011, and our conference call on September 20, 2011. NV Energy has made the additional changes to our application to amend our existing Class III landfill.

- 1) Overall and lateral expansion volumes – these are all listed in Section 5.3. We reiterate them in Section 4.1 (Solid Waste Characterization) part of the application as well to make it the application flow easier.
- 2) Grades in the final grading plan – the cross-sections show the grades specified in the text. A label was added to Figure 4 to specify those grades.
- 3) "Runoff ditch to nowhere" in Figure 3 – no specific runoff ditch is shown in this figure, although there is an item for that in the key that indicates runoff ditches. We removed from the Key item for runoff ditches from figure 3 and place conceptual design for runoff ditches on Figure 4.
- 4) "Detention basin noted in the text" – the existing small basin is referred to in the text, but this is not identified in Figure 3. This was highlighted in the original Figure 3 drawing design drawing but no runoff calculations were ever made, as far as we know.
- 5) "Diversion ditch inside expansion" – there is no diversion ditch shown on Figure 3. Cleaned up drawing to make it easier to read.
- 6) "Ponds and solid waste area inside the expansion" – this is because these are intended for future disposal in the Class III landfill per this modification request

If you have any questions or require additional information, please contact Teri Bowman at 775-834-2371 or Tony Garcia at 702-402-5767.

Respectfully,

Alan Anderson  
Plant Director  
NV-Energy North Valmy Generating Station
