

PUBLIC NOTICE

NOTICE OF RCRA PERMIT MODIFICATION REQUEST 60-DAY PUBLIC COMMENT PERIOD and PUBLIC INFORMATION MEETING

21st Century Environmental Management of Nevada, LLC Fernley, Nevada

In accordance with 40 CFR 270.42, 21st Century Environmental Management of Nevada, LLC is providing notice of a facility-requested modification of RCRA Permit #NEVHW0024 for its Fernley facility. The requested modification involves the addition of a cover over the East Pad Container Storage Area and waste consolidation activities that may be performed in the Solids Receiving Area at the facility.

General Facility Operations

21st Century Environmental Management of Nevada, LLC, located at 2095 E. Newlands Drive, Fernley, NV 89408, is a commercial hazardous waste treatment, storage, and recycling management facility. Typical wastes managed at the facility include acids, alkalines, metal-bearing aqueous liquids and sludges, cyanides, batteries, and household hazardous wastes. A full list of wastes treated and/or stored on site can be found in RCRA Permit NEVHW0024. There is no onsite disposal of waste at the facility.

Summary of the Requested Class 2 Permit Modification

FEMOD8-2 – Cover and Containment Upgrade for East Pad Container Storage Area and Addition of Waste Consolidation at Solids Receiving Area

This modification involves the addition of a cover over the East Pad Container Storage Area and addition of descriptions of waste consolidation activities that may be performed in the facility's Solids Receiving Area. These changes will result in a reduction of waste storage capacity on the East Container Storage Area from 896 to 558 cubic yards. A figure is being revised to better illustrate and clarify the space allocated for the East Container Storage Area that includes universal waste, the oxidizer locker, and waste containers including rolloffs. The modification includes figures showing the East Pad Container Storage Area and its cover and secondary containment calculations for the East Pad Container Storage Area.

During the time of the East Pad cover construction, temporary storage of containers will be in trailers staged on the Northeast Trailer Pad. This temporary container storage will not increase facility storage capacity and is requested as part of this modification. During the East Pad cover construction, temporary storage will be limited to non-liquid phase waste. Temporary berms will be placed around the trailers to mitigate the possibility of waste migrating from the concrete pad in the event of a spill.

The requested change will decrease, not increase, the overall storage capacity at the facility. The modification has been submitted as a Class 2 RCRA Permit Modification pursuant to 40 CFR 270.42, Appendix I, F.2.a. and F.2.b.

Public Information Meeting

A public information meeting for the submitted modification will be held Wednesday, October 12, 2016, at 6:00 PM in the conference room of the 21st Century Environmental Management facility located at 2095 Newlands Drive East in Fernley, Nevada. Please note that the public meeting is intended to provide information regarding the submitted modification request. Any formal public comments should be directed to the NDEP contact person below.

Availability of RCRA Permit and Associated Documents

The RCRA Part B Permit, the modifications presented above, and supporting documentation can be reviewed at:

Nevada Division of Environmental Protection (NDEP)
Bureau of Waste Management
901 S. Stewart Street, Suite 4001
Carson City, Nevada 89701

Opportunity for Public Comment

Any comments on this modification should be submitted in writing to the NDEP Division Contact Person. The 60-day comment period for this modification will end at 5:00 PM on November 28, 2016, or 60 days from the first publication of this notice, whichever comes later.
