NDEP ISSUES CLASS II AIR PERMIT FOR BANGO OIL

CARSON CITY – The Nevada Division of Environmental Protection (NDEP) has issued the Class II Air Quality Operating permit to Bango Oil, LLC based upon the application submitted to NDEP in July of 2008. This permit will allow them to increase their operating capacity and improve the quality of their product. After a thorough analysis, NDEP has found that the proposed modification meets all applicable air quality standards and requirements. Therefore, NDEP is required under State and Federal Law to issue the permit.

NDEP recognizes that there continue to be significant concerns about odors in Western Churchill County. NDEP is committed to continuing to work with the County and its residents to resolve their concerns.
