

Targeted Brownfields Assessments Funding

Region 9 Brownfields is getting about \$300k in stimulus funding for Targeted Brownfields Assessments (TBAs), so we will be targeting states and tribes in order to expend the money. Please let your tribal counterparts know about this opportunity. They can go ahead and fill out the on-line application (see attached) or contact me for more information. TBAs are performed by EPA contractors, so no money actually goes to the tribe and there must be some reuse or redevelopment at the area to be assessed for TBA money to be used. TBAs generally run about \$50k on average.

As part of a TBA, EPA can perform Phase I and/or Phase II Assessments. ("Hint"... it is better to be more inclusive of the work that is needed than less inclusive, when discussing the work during the initial consultation with EPA and the contractor.) Also, TBA money **cannot** be used for site-specific projects under 128(a) that could not be funded. Thanks.
