Re: Annual Recycling Data Collection

Dear Recycler:

In order to generate a report that accurately reflects the state of recycling in Nevada, the Nevada Division of Environmental Protection (NDEP) collects recycling data annually, per NRS 444A.070. Counties with populations greater than 45,000 are required to provide certain recycling services per NRS 444A.040 and to participate in this survey. All Nevada Counties are encouraged to participate. County data is then compiled by NDEP to calculate the state recycling rate. This data is then posted on <http://nevadarecycles.nv.gov/Resources/Data/>.

We would greatly appreciate your cooperation with county employees working to gather recycling data in a timely manner. According to NAC 444A.135, the deadline for Form B to be returned to your county is February 15, 2019. Please use Form B to report your data to the county. Form B pages 2-3 standardizes data collection and lists the materials typically counted as recyclable in Nevada. Only materials generated within the county to which you are reporting should be counted. Should you collect or process materials from multiple counties, please do your best to report the materials to the respective county. It is also important to indicate which processor or collector your recyclable materials go to in order to minimize double-counting those same materials. Form B should be provided to you by the municipality, and can also be found online at <http://nevadarecycles.nv.gov/Resources/Data/>.

If you have any questions or require assistance, please contact one of the State of Nevada's Recycling Coordinators.

Thank you for your assistance.

Sincerely,

Rachel Lewison
