**Notice of Request for Section 401 Water Quality Certification Action - Bureau of Water Quality
Planning**

Web Posting: 10/13/2026

Deadline for Comments: 11/12/2026

**Kingston Campground Bridge Replacement
Lander County**

**United States Forest Service
1200 Franklin Way
Sparks, NV 89431**

Certification Action Number NV-401-26-024

The purpose of the proposed project is to replace an existing road bridge with pipe-arch culverts within Kingston Creek in Lander County, Nevada. The structural components of the current bridge are failing beyond the point of repair and scour has undermined the abutments. The existing bridge, along with the mortared stone abutments, would be replaced by two pipe-arch culverts in the same location. Two pipe-arch corrugated metal pipe culverts will be installed in series and Class 2 riprap would be placed around the culvert. The proposed activities would incorporate a Water Diversion Plan, where a sandbag and plastic cofferdam would be hand-built to divert flows away from one abutment wall of the existing bridge. Once the abutment is removed, one of the culverts would be installed and partially backfilled and armored. The creek would then be diverted into the installed culvert. The project is anticipated to commence either November 15, 2026 or July 1, 2027. The project proponent has requested certification for the use of Nationwide Permit 14 (Linear Transportation Projects) under Clean Water Act Section 404 administered by the U.S. Army Corps of Engineers.

A 401 certification (or a waiver of certification) is required for any federal license or permit that authorizes activities that may result in any discharge into waters of the United States. Nevada Division of Environmental Protection is in receipt of a complete request for certification in compliance with Clean Water Act Section 401 Certification regulations which the U.S. Environmental Protection Agency promulgated in 2023, codified as 40 CFR 121.

The Administrator is evaluating whether the proposed activity will comply with applicable water quality requirements. Certification actions are valid for the duration of the federal license or permit (typically five

years). Any conditions contained within the certification action become a condition of the federal license or permit.

Persons wishing to comment on the application for consideration by the Administrator in making a determination regarding the certification action should submit their comments or request a hearing in writing, emailed no later than 5:00 P.M. on 11/12/2026:

Bureau of Water Quality Planning
901 South Stewart Street, Suite 4001
Carson City, Nevada 89701-5249
ndep401@ndep.nv.gov

The request for a hearing must be filed within the comment period and must indicate the interest of the person filing the request and the reasons why a hearing is warranted. All water quality-related comments or objections received within the thirty (30) day period will be considered in the formulation of final certification action regarding the application. If written comments indicate a significant degree of public interest in the proposed permit, the Administrator shall hold a public hearing. A public notice of such hearing will be issued not less than thirty (30) days prior to the hearing date.

The applications, proposed permits, comments received, and other information are on file and may be copied, or copies may be obtained by writing to the above address or by contacting Zachary Carter, Bureau of Water Quality Planning, at (775) 687-9456 or ndep401@ndep.nv.gov. The public notice for this project can be viewed at the following website: <https://ndep.nv.gov/posts/category/water>.

Please bring the foregoing notice to the attention of all persons interested in this matter.
