Director’s Review and Preliminary Determination of Permit Issuance for

**Solidus Resources, LLC
Spring Valley Mine Project
Pershing County, Nevada
December 1, 2025**

Solidus Resources, LLC (Solidus) submitted an application for a new Class II Air Quality Operating Permit, AP1041-4680, FIN A2214, for the Solidus facility in Pershing County, Nevada. The project is located in all or portions of Sections 24 through 28 and 33 through 36, Township 29 N, Range 34 E; Sections 19 through 21 and 28 through 32, Township 29 N, Range 35 E; Sections 1 through 4, Township 28 N, Range 34 E; and Sections 4 through 6, Township 28 N, Range 35 E, M.D.B.&M.

Solidus Resources, LLC proposes to operate an open pit, heap leach, and precious metals recovery mining operation. The site will include crushing and screening, cyanide heap leach, and refinery operations.

The Nevada Division of Environmental Protection – Bureau of Air Pollution Control (BAPC) has reviewed the application for the above-referenced operating permit, and has made a preliminary determination to issue the operating permit. The facility-wide Potential to Emit (PTE), including emissions from Non-Permit equipment are given in the table below.

Current emissions estimates indicate Solidus is a <i>Class II source</i> , because the facility-wide PTE for any individual regulated pollutant is less than 100 tons per year.	<i>Solidus Potential to Emit (PTE)</i>			
	Pollutant		Facility-Wide (tons/year)	Class II (tons/year)
	PM	Particulate Matter	94.9	94.3
	PM₁₀	Particulate Matter ≤ 10 microns in diameter	51.5	50.9
	PM_{2.5}	Particulate Matter ≤ 2.5 microns in diameter	30.2	29.6
	SO₂	Sulfur Dioxide	0.0031	0.0031
	NO_x	Oxides of Nitrogen	0.30	0.30
	CO	Carbon Monoxide	1.54	1.54
	VOC	Volatile Organic Compounds	0.63	0.63
	Pb	Lead	N/A	N/A
	HAP (single)	Hazardous Air Pollutants	N/A	N/A
	HAPs (all)	Hazardous Air Pollutants	0.0031	0.0031

The project is located in Air Quality Hydrographic Area (HA) 129 of the Buena Vista Valley, and HA 73A of the Lovelock Valley/Oreana Sub-Area. HA 129 and HA 73A are not triggered basins for increment analyses. Solidus will be subject to 40 CFR Part 60 Subpart LL – Standards of Performance for Metallic Mineral Processing Plants, 40 CFR Part 60 Subpart IIII – Standards of Performance for Stationary Compression Ignition Internal Combustion Engines, 40 CFR Part 63 Subpart ZZZZ – National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines, and 40 CFR Part 63 Subpart CCCCCC – National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Dispensing Facilities.

Air dispersion modeling conducted by the applicant and the Nevada Division of Environmental Protection – Bureau of Air Quality Planning (BAQP) demonstrates that continued operation of Solidus, will not violate any air quality standard.

Solidus must comply with all State and Federal air quality requirements and all conditions established within the proposed draft Class II Air Quality Operating Permit.
