Director's Review and Preliminary Determination of Permit Issuance for

Centennial Asphalt Company dba PNAC
Fernley Asphalt Terminal
Lyon County, Nevada
November 5, 2026

Centennial Asphalt Company dba PNAC (PNAC) submitted an application for a renewal Class II Air Quality Operating Permit, AP5171-2054.04, FIN A0508, for the Fernley Asphalt Terminal facility in Lyon County, Nevada. The project is located Fernley, Nevada, in all or portions of Section 11, Township 20N, Range 24E, M.D.B.&M.

The facility submitted an application for the renewal of their existing Class II Air Quality Operating Permit.

The Nevada Division of Environmental Protection – Bureau of Air Pollution Control (BAPC) has reviewed the application for the above-referenced operating permit, and has made a preliminary determination to issue the operating permit. The facility-wide Potential to Emit (PTE), including emissions from Non-Permit equipment are given in the table below.

	Fernley Terminal Potential to Emit (PTE)		
	Pollutant		**Facility-Wide (tons/year)**
Current emissions estimates indicate PNAC is a *Class II source*, because the facility-wide PTE for any individual regulated pollutant is *less* than 100 tons per year.	**PM**	Particulate Matter	5.85
	PM_{10}	Particulate Matter ≤ 10 microns in diameter	5.85
	$PM_{2.5}$	Particulate Matter ≤ 2.5 microns in diameter	5.85
	SO_2	Sulfur Dioxide	18.30
	NO_x	Oxides of Nitrogen	28.96
	CO	Carbon Monoxide	20.12
	VOC	Volatile Organic Compounds	5.41
	HAPs (all)	Hazardous Air Pollutants	4.67

The project is located in Air Quality Hydrographic Area (HA) 76 of the Fernley Area. HA 76 is designated as PSD and is triggered for SO2 and PM2.5 PNAC will be subject to 40 CFR Part 60 Subpart Dc – Standards of Performance for Small Industrial Commercial Institutional Steam Generating Units.

Air dispersion modeling conducted by the applicant and the Nevada Division of Environmental Protection – Bureau of Air Quality Planning (BAQP) demonstrates that continued operation of PNAC, will not violate any air quality standard.

PNAC must comply with all State and Federal air quality requirements and all conditions established within the proposed draft Class II Air Quality Operating Permit.
