Director's Review and Preliminary Determination of Permit Issuance for

Harrah's Lake Tahoe Hotel Casino
Lake Tahoe Hotel Casino
Douglas County, Nevada
November 13, 2026

Harrah's Lake Tahoe Hotel Casino (Harrah's) submitted an application for a renewal Class II Air Quality Operating Permit, AP7011-3688.02, FIN A0574, for the Harrah's Lake Tahoe Hotel Casino facility in Douglas County, Nevada. The project is located at Hwy 50 and Stateline Ave., in Stateline, Nevada, in all or portions of Section 27, Township 13N, Range 18E, M.D.B.&M.

This permitting action is an Administrative Renewal.

The Nevada Division of Environmental Protection – Bureau of Air Pollution Control (BAPC) has reviewed the application for the above-referenced operating permit, and has made a preliminary determination to issue the operating permit. The facility-wide Potential to Emit (PTE), including emissions from Non-Permit equipment are given in the table below.

	Harrah's Lake Tahoe Hotel Casino Potential to Emit (PTE)		
	Pollutant		**Facility-Wide (tons/year)**
Current emissions estimates indicate Harrah's is a *Class II source*, because the facility-wide PTE for any individual regulated pollutant is *less* than 100 tons per year.	**PM**	Particulate Matter	4.40
	PM_{10}	Particulate Matter ≤ 10 microns in diameter	4.40
	$PM_{2.5}$	Particulate Matter ≤ 2.5 microns in diameter	4.40
	SO_2	Sulfur Dioxide	0.26
	NO_x	Oxides of Nitrogen	17.3
	CO	Carbon Monoxide	5.97
	VOC	Volatile Organic Compounds	2.06
	HAPs (all)	Hazardous Air Pollutants	0.61

The project is located in Air Quality Hydrographic Area (HA) 90 of the Lake Tahoe Basin. HA 90 is not a triggered basin for an increment anlaysis. Harrah's is subject to 40 CFR Part 60 Subpart Dc, 40 CFR Part 63 Subpart CCCCCC, and 40 CFR Part 63 Subpart ZZZZ.

Air dispersion modeling conducted by the applicant and the Nevada Division of Environmental Protection – Bureau of Air Quality Planning (BAQP) demonstrates that continued operation of Harrah's will not violate any air quality standard.

Harrah's must comply with all State and Federal air quality requirements and all conditions established within the proposed draft Class II Air Quality Operating Permit.
