

**BUREAU OF MINING REGULATION AND RECLAMATION  
RECLAMATION PERMIT TRANSFER REQUEST FORM**

Be it hereby known that \_\_\_\_\_ requests the  
(Proposed Operator name)  
transfer of Reclamation Permit number \_\_\_\_\_ for the \_\_\_\_\_ Project  
(Project name)  
from the current permittee \_\_\_\_\_. As per the requirements of Nevada  
(Current Operator name)  
Administrative Code (NAC) 519A.215(1a), by this request, \_\_\_\_\_  
(Proposed Operator name)  
agrees to assume responsibility for the reclamation of any affected land which is the subject of the existing  
permit. In addition, as per NAC 519A.215, I confirm evidence of surety by attaching a copy of the bond acceptance  
letter from the appropriate federal land management agency, as applicable.

**Water Pollution Control (WPC) Permit Transfer Information, if applicable:**

**445A.419 Transfer of Water Pollution Control Permit to new owner or operator**

1. If the project has a WPC Permit, the permit must be transferred to the new owner or operator at the same time as the transfer of the reclamation permit.
2. Before the ownership or operation of a facility may be transferred during the term of the WPC permit, the holder of the WPC permit must inform the new owner or operator in writing of the requirements of the current WPC permit and the requirements of Nevada Administrative Code (NAC) 445A.350 to 445A.447, inclusive.
3. A copy of that written notice must be sent to the Bureau of Mining Regulation and Reclamation (BMRR) as well as a completed WPC Permit Application.
4. The new owner or operator must state in writing to BMRR that he will comply with the existing operating plans or provide revised plans to BMRR for review and approval.
5. Until written approval is given by BMRR to the new operator or owner that the WPC permit has been transferred, the current operator or owner named on the WPC permit is responsible for complying with NAC 445A.350 to 445A.447, inclusive.

(Added to NAC by Environmental Comm'n, eff. 9-1-89 -- (Substituted in revision for NAC 445.24338)

**Bureau of Land Management (BLM) Transfer/Change of Operator Information, if applicable:**

Any change of operator or owner must be promptly reported to the appropriate BLM field office. In the event of a change of operator or owner involving an approved plan of operations, the BLM will not transfer reclamation responsibility to the new operator or owner until it is assured that the new operator or the subject operation has satisfied the requirements of the 43 CFR 3802 and 3809 regulations as they relate to bonding. Reclamation responsibility remains with the existing bond until satisfactory replacement bonding is submitted to the BLM and accepted for the project. *To expedite approval of operator or owner transfership, the form contained in this attachment may be submitted to the appropriate BLM field office.*

**3.0 Applicant Acknowledgments**

- 3.1 The Applicant understands and agrees to accept all reclamation responsibility for the proposed affected land with a determined surety bond amount based upon site-specific project criteria as defined in the project’s Plan of Operation and Reclamation Plan.
- 3.2 The Applicant understands and agrees, pursuant to NAC 519A.350 and NAC 519A.360, to accept the responsibility for the affected land with an acceptable surety bond amount obligated in coordination with the cooperating agencies thru a Memorandum of Understanding and **prior** to affecting the land.
- 3.3 The Applicant understands and agrees, pursuant to NAC 519A.043 and NAC 519A.050, if additional acres are proposed to be affected, (> greater than the acreage approved in the Reclamation Plan and reclamation Permit), a modification submittal must propose the additional acres to be affected, the appropriate permit modification fee, and the increased surety bond amount must be approved and obligated **prior** to affecting the land.
- 3.4 The Applicant understands and agrees, Per NAC 519A.235, that the reclamation annual fees and the annual “As-Built” disturbance report are required to be submitted **on or before April 15 of every calendar year** based upon the permitted acres and the “as-built” public/private acres affected as of the end of December 31<sup>st</sup> of the prior year to maintain permit compliance. The annual fees shall continue to be due each year until the agencies have determined that all reclamation requirements have been achieved.
- 3.5 The Applicant understands and agrees, Per NAC 519A.380, that a three-year reclamation cost update is required to be submitted every three years after the effective issuance date of the reclamation permit to account for inflation and ensure adequate funds are available to the agencies(s) to perform the reclamation activities described in the approved reclamation plan in the case of operator default.
- 3.6 The Applicant understands and agrees to complete and submit an Affidavit, under the penalty of perjury, with the Reclamation Permit Application provided on Page 5 of this document.
- 3.7 The Applicant understands and agrees that the approved Reclamation Plan/Permit **does not constitute**:
  - 3.7.1 Certification of land ownership to any person named herein; and
  - 3.7.2 Recognition of the validity of any mining claim(s) herein.
- 3.8 The Applicant understands and agrees that the approval of the Reclamation Plan and Permit does not relieve the operator of the responsibility to comply all other applicable State and Federal regulations.
- 3.9 The Applicant understands and agrees that any information provided in the Reclamation Plan that is marked ‘Confidential’ will be treated in accordance with the agency’s regulations.

The Applicant hereby agrees to have reviewed the acknowledgements noted above including the approved Plan of Operations, the Reclamation Plan, and understands that no portion of the obligated surety amount will be released until an Attachment A document (enclosed with reclamation permit) has been properly submitted to the cooperating agencies to initiate a site inspection. Upon concurrent agency approval of the completed reclamation work, the lead agency holding the obligated surety amount will authorize a surety bond release for the project.
