# Requirement for Ranking

A priority system must be used to rank treatment works\* projects that are considered eligible for financial assistance from the fund

- 33 U.S. Code §1383(g)
- NAC 445A.767(1)

The priority system must give highest priority to projects that are necessary to meet the enforceable requirements of the Clean Water Act.

Include in the criteria for ranking projects:

- The elimination of pollution from waters within the state
- The protection of health of the public
- The attainment of standards of water quality adopted by the state
- The operation of the fund in such a manner so as to impose the least possible financial burden on municipalities.

\*Projects not considered treatment works are not required to be on a priority list. State regulations are still being amended.

# Ranking Process

	Points
Priority Class Points	A, B, C
Water Quality Factor	+A, or +B
Asset Management	Add
Project Readiness	Add
Green Projects	Add
Initial Points	Subtotal
Affordability Criteria	Add 25
Final Points	Final

## Priority Classes

### **Class A: Projects that benefit public health and/or environment**

- Necessary to eliminate documented public health hazards
- To correct existing violations of surface water quality standards

### **Class B: Projects to Increase reliability and sustainability**

- To maintain beneficial uses
- To address facility flow or loading
- To address sewer system rehabilitation and reclaimed water distribution

### **Class C: Projects meeting other clean water needs**

- All other treatment works or pollution control projects

## Additional Points

### **Water Quality Factor**

- Up to 5 points
- Relates with allowable loadings of pollutants for a waterbody

### **Asset Management**

- Up to 3 points
- Relates to whether the system has been proactive in identifying their capital assets, supporting their maintenance, and funding replacement.

### **Project Readiness**

- Up to 10 points
- Relates to how far along the project is ready towards construction

# Green Projects

(5 pts):

- Water & energy efficiency upgrades;
- On-site clean power production;
- Reuse of effluent;
- Establishment or restoration of permanent riparian buffers, other vegetative buffers, floodplains, or wetlands;
- Project to manage wet weather & restore hydrology by infiltration, evapotranspiration, or harvesting & use of storm water; or
- Green storm water infrastructure

# Affordability for additional subsidy

## **Nevada Administrative Code:**

No definition. Program requirements must be outlined in the annual Intended Use Plan (NAC 445A.764)

## **Federal Clean Water Act Requirements:**

Section 603(i)(2) requires states to develop affordability criteria for additional subsidization based on income, unemployment data, population trends, and other data determined relevant by the state.

## **2023 Clean Water Intended Use Plan:**

- 50 points are needed to qualify for principal forgiveness
- 25 points will be added to the initial score for systems qualifying through the affordability criteria

# Affordability criteria

- Income Factors
  - Median Household Income versus State MHI
  - Poverty Levels in the service area
- Population trends
  - Change in population over a three-year period based upon the latest American Community Survey data available
- Unemployment
  - Percent of the population not in the workforce
  - Unemployment rate of service area
- Affordability
  - Whether or not an interest-bearing loan will increase already sufficient user rates by 10%, 20%, or 30%.
    - This also has a look-back option for 5 years.
  - Residential rates compared to MHI
    - Based on 1.0%, 1.5%, and 2.0%
- Other Factors
  - Nature of the project
  - Incentives for project types
  - Financial assistance from government or political subdivisions
