

**PROPOSED REGULATION OF THE
STATE ENVIRONMENTAL COMMISSION**

LCB File No. R113-22

July 26, 2022

EXPLANATION – Matter in *italics* is new; matter in brackets ~~[omitted material]~~ is material to be omitted.

AUTHORITY: §§ 1, 2 and 17-28, NRS 445A.425 and 445A.520; §§ 3-13, 16, 29, 30 and 34-36, NRS 445A.425 and 445A.465; § 14, NRS 445A.425, 445A.465 and 445A.565; § 15, NRS 445A.425, 445A.465 and 445A.475; § 31, NRS 445A.425, 445A.465, 445A.495; § 32, NRS 445A.425, 445A.465 and 445A.500; § 33, NRS 445A.425, 445A.430, 445A.465 and 445A.480.

A REGULATION relating to water; establishing provisions for the classification of certain waters as waters of extraordinary ecological, aesthetic or recreational value; defining certain terms relating to an antidegradation review process; establishing provisions for an antidegradation review process for point source discharges into surface waters of this State; revising provisions relating to standards for water quality; revising various provisions relating to discharge permits, general permits and zones of mixing; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law requires the State Environmental Commission to adopt regulations relating to water pollution control, including water quality standards and limitations on the discharge of waste to protect designated beneficial uses of the waters of this State. (NRS 445A.425, 445A.520) Under existing regulations, the Commission has established water quality standards to protect existing and designated beneficial uses, which include protections for waters of extraordinary ecological or aesthetic value. (NAC 445A.122) **Section 2** of this regulation sets forth a process for the Commission to classify a water of this State or segment thereof as a water of extraordinary ecological, aesthetic or recreational value **Section 2** also requires the Commission to designate a level of antidegradation protection for the classified water, which must be either Tier 3 or Tier 2.5. **Sections 18-28** of this regulation make conforming changes to revise the term “water of extraordinary ecological or aesthetic value” to “extraordinary ecological, aesthetic or recreational value”

Sections 3-16 of this regulation set forth an antidegradation review process for discharges into surface waters of this State to protect the water quality of surface waters of this State and maintain the higher water quality levels of the parameters of concern in those waters in which the parameters of concern have higher water quality levels than is required by existing water quality

standards. **Section 17** of this regulation makes conforming changes to incorporate these provisions into existing definitions for the chapter.

Sections 3-7 of this regulation define various terms relating to the antidegradation review process.

Section 8 of this regulation provides that the antidegradation provisions set forth in **sections 3-16** do not apply to an activity that may result in the temporary or limited degradation of water quality that the Director of the State Department of Conservation and Natural Resources determines is necessary for certain reasons.

Section 9 of this regulation requires that for the purposes of the provisions governing the antidegradation review process, waters classified as waters of extraordinary ecological, aesthetic or recreational value must be designated as having a Tier 3 or Tier 2.5 level of antidegradation protection and any surface water of this State that is not classified as a water of extraordinary ecological, aesthetic or recreational value must be protected on a parameter-by-parameter basis at a Tier 2 or Tier 1 level of antidegradation protection. **Section 9** provides that: (1) with certain exceptions for effluent-dominated waters, the Tier 2 level of antidegradation protection will apply to a parameter of concern in the receiving water if the baseline water quality of the parameter of concern is better than the applicable water quality standard for that parameter of concern or if a requirement to maintain higher quality has been promulgated for the parameter of concern; and

(2) the Tier 1 level of antidegradation protection will apply if the baseline water quality of a parameter of concern in the receiving water is the same or worse than the applicable water quality standard or, with certain exceptions, if the parameter of concern is present in an effluent-dominated receiving water.

Section 10 of this regulation provides that the antidegradation provisions of this regulation do not: (1) affect the provisions of title 48 of NRS pertaining to water; (2) prohibit or impair any use of water authorized under title 48 of NRS; or (3) entitle an appropriator to water of a specific quality.

Section 11 of this regulation provides that under the: (1) Tier 3 level of antidegradation protection, the State Department of Conservation and Natural Resources is required to deny, with limited exceptions, any applications for a new or modified discharge into the classified water; (2) Tier 2.5 level of antidegradation protection, the Department is authorized to grant an application for a new or modified discharge if the Department determines that the discharge will not degrade the water quality for a parameter of concern in the receiving water or have a negative impact on an attribute for which the water has been designated with the beneficial use of “extraordinary ecological, aesthetic or recreational value”; (3) Tier 2 level of antidegradation protection, the Department is authorized to grant an application for a new or modified discharge that will degrade the existing water quality for a parameter of concern in the receiving water if approved by the Commission under certain circumstances; and (4) Tier 1 level of antidegradation protection, the Department is required to protect the existing and designated beneficial uses in accordance with the applicable water quality standards.

Section 12 of this regulation requires, with certain exceptions, the Department to conduct an antidegradation review when an application to discharge into the surface waters of this State is submitted to the Department.

Section 13 of this regulation sets forth the requirements for an antidegradation review, which must: (1) with certain exceptions, be conducted on a parameter-by-parameter basis; and (2) evaluate the potential impacts of the point source discharge on the parameters of concern present in the receiving water.

Existing law prohibits the discharge of waste into the surface waters of the State that will result in the degradation of water quality of waters whose quality is higher than the applicable standards of water quality unless the person demonstrates to the Commission that the lower quality is justifiable because of economic or social considerations. (NRS 445A.565) **Section 14** of this regulation provides that if the antidegradation review determines that the discharge will degrade the existing water quality for a parameter of concern in the receiving water with a Tier 2 level of antidegradation protection, the applicant is required to submit to the Department an analysis of alternatives for the review of the Commission. **Section 14** further provides that if the analysis of alternatives does not identify a technologically feasible and economical alternative that would prevent or reduce the impact of the discharge on the water quality level of the parameter of concern in the receiving water, the applicant is required to submit for the review of the Commission a justification based on the economic or social importance of the discharge. **Section 14** provides that the Commission will hold a hearing on the justification and, based on certain findings, may approve the issuance of a permit for the discharge.

Section 15 of this regulation sets forth the antidegradation requirements for a general permit.

Section 16 of this regulation sets forth the antidegradation requirements for a storm water runoff permit.

Sections 18-36 of this regulation make conforming changes to incorporate the antidegradation process into existing requirements for applications for discharge permits, general permits and zones of mixing.

Section 1. Chapter 445A of NAC is hereby amended by adding thereto the provisions set forth as sections 2 to 16, inclusive, of this regulation.

Sec. 2. *As used in sections 2 to 18, inclusive, of this regulation, unless the context otherwise requires, the words and terms defined in sections 2 to 8, inclusive, of this regulation have the meanings ascribed to them in those sections.*

Sec. 3. *“Parameter of concern” means a parameter with a water quality standard set forth in NAC 445A.11704 to 445A.2234, inclusive, or that has been determined by the Department to be of concern.*

Sec. 4. *“Baseline water quality” means the existing water quality for each parameter of concern in a surface water or segment thereof. Baseline water quality is established by the*

Department based on not less than 20 samples collected approximately 90 days apart over a period of at least five years at a location designated by the Department.

Sec. 5. *“Interim baseline value”, or IBV, means the interim estimate of baseline water quality for each parameter of concern in a surface water or segment thereof when the baseline water quality has not yet been established. The IBV is established by the Department based on not less than eight samples collected approximately 90 days apart over a period of at least two years.*

Sec. 6. *“Requirement to maintain existing higher quality”, or RMHQ, means a water quality standard established by the Commission for a parameter when the baseline water quality has been determined by the Department to be better than the water quality criteria set forth in NAC 445A.11704 to 445A.2234.*

Sec. 7. *“Effluent-dominated water” means a surface water or segment thereof that consists of greater than 80 percent wastewater effluent for at least 300 days of the year.*

Sec. 8. *“Tiers of antidegradation protection” are defined as:*

- 1. “Tier 1” means baseline water quality, on a parameter-by-parameter basis, is determined by the Department to not be better than the water quality standards assigned to that surface water or segment thereof; or the surface water or segment thereof is an effluent-dominated water. Applicable water quality standards for each Tier 1 parameter set forth in NAC 445A.11704 to 445A.2234 must be maintained to protect existing and designated beneficial uses.*

2. *“Tier 2” means baseline water quality, or IBV, on a parameter-by-parameter basis, is determined by the Department to be better than the water quality standards assigned to that surface water or segment thereof and for which a RMHQ has been or may be established. This designation prohibits water quality degradation for each Tier 2 parameter unless conditions specified in Section 14 are met.*
3. *“Tier 2.5” means the beneficial use of “extraordinary aesthetic, ecological, or recreational value” has been designated by the Commission to a surface water or segment thereof. This designation prohibits degradation of water quality but does not prohibit new or expanded discharges into or upstream of the surface water or segment thereof if the Department determines the baseline water quality will not be degraded.*
4. *“Tier 3” means the beneficial use of “extraordinary aesthetic, ecological, or recreational value” has been designated by the Commission to a surface water or segment thereof. This designation prohibits degradation of water quality. New or expanded discharges into the surface water or segment thereof are prohibited and are allowable upstream only if the Department determines the baseline water quality will not be degraded.*

Sec. 9. *The provisions of sections 2 to 18, inclusive, of this regulation do not apply to any activity which may result in the temporary degradation of water quality if the Director determines that the activity is necessary:*

1. *To accommodate public health and safety in the area in which the surface water is located; or*
2. *For an emergency response to mitigate an immediate threat to public health or safety.*

↪ *Any such activity must not be reoccurring, and the Department shall ensure that any controls necessary are implemented to minimize water quality degradation.*

Sec. 10. *If a parameter of concern has a Tier 1 level of antidegradation protection, the Department:*

- 1. Shall maintain and protect the water quality necessary to meet the applicable water quality standard set forth in NAC 445A.11704 to 445A.2234, inclusive; and*
- 2. May authorize a new or expanded point source discharge if the Department determines water quality will not be degraded beyond the applicable standards for water quality set forth in NAC 445A.11704 to 445A.2234.*

Sec. 11. *If a parameter of concern has a Tier 2 level of antidegradation protection, the Department:*

- 1. Shall, except as otherwise provided in subparagraph (2), maintain and protect the established RHMQ, baseline water quality, or IBV; and*
- 2. May authorize a new or expanded point source discharge that will degrade the established RHMQ, baseline water quality, or IBV if the discharge is approved by the Commission pursuant to section 15 of this regulation.*

Sec 12.

- 1. The Commission may designate a surface water or segment thereof with the beneficial use of “extraordinary ecological, aesthetic, or recreational value” if it is determined that the water has one or more of the following:*

- (a) Water quality that is better than the applicable water quality standards;*
 - (b) One or more unique water quality characteristic or attributes; or*
 - (c) Some other extraordinary ecological, aesthetic, or recreational value.*
- 2. The designation of a surface water or segment thereof with the beneficial use of “extraordinary ecological, aesthetic, or recreational value” must not be used to prohibit the use of water as authorized under Title 48 of NRS.*
- 3. For a surface water or segment thereof with the beneficial use of “extraordinary ecological, aesthetic, or recreational value”, the Commission will designate a Tier 2.5 or Tier 3 level of antidegradation protection to the surface water or segment thereof.*
- 4. For a surface water or segment thereof having Tier 2.5 level of antidegradation protection, the Department:*
 - (a) Shall:*
 - (1) Maintain and protect the established baseline water quality and/or any RMHQ of the Tier 2.5 surface water or segment thereof; and*
 - (2) Prohibit any new or expanded point source discharge into or upstream of the Tier 2.5 surface water or segment thereof that the Department determines will degrade the baseline established water quality and/or any RMHQ or have a detrimental impact on the Tier 2.5 surface water or segment thereof;*
 - (3) Prohibit any new or expanded zone of mixing within the Tier 2.5 surface water or segment thereof; and*
 - (b) Shall not prohibit:*
 - (1) A point source discharge that was authorized by the Department before the surface water or segment thereof was designated as Tier 2.5, if the request to renew or modify*

the discharge permit will not alter a zone of mixing or expand the point source discharge;

- (2) A modification or renewal to an existing storm water runoff permit or an application for a new storm water runoff permit, if the Director determines the applicant has demonstrated the established baseline water quality and/or any RMHQ in the receiving water will be maintained and protected; or*

- (3) An activity authorized by the Department to restore, maintain, or improve the water quality of the Tier 2.5 surface water or segment thereof.*

- 5. For any surface water or segment thereof having Tier 3 level of antidegradation protection, the Department:*

- (a) Shall maintain and protect the established baseline water quality and/or any RMHQ of the Tier 3 surface water or segment thereof;*

- (b) Shall prohibit:*

- (1) Any new or expanded point source discharge into the Tier 3 surface water or segment thereof; and*

- (2) Any new or expanded point source discharge that occurs upstream of the Tier 3 surface water or segment thereof that the Department determines will degrade the established baseline water quality and/or any RMHQ or have a detrimental impact on the Tier 3 surface water or segment thereof; and*

- (c) Shall not prohibit:*

- (1) A point source discharge that was authorized by the Department before the surface water or segment thereof was designated as Tier 3, if the request to renew or modify the discharge permit will not alter a zone of mixing or expand*

the point source discharge;

- (2) A modification or renewal to an existing storm water runoff permit or an application for a new storm water runoff permit, if the Director determines the applicant has demonstrated the established baseline water quality and/or any RMHQ in the receiving water will be maintained and protected; or*
- (3) An activity authorized by the Department to restore, maintain, or improve the water quality of the Tier 3 surface water or segment thereof.*

Sec. 13. *The Department shall conduct an antidegradation review to ensure the requirements set forth in sections 2 to 18, inclusive, of this regulation are met if a person submits a permit application pursuant to NAC 445A.230 for:*

- 1. A new point source discharge.*
- 2. A permit renewal or modification that will result in an expanded point source discharge, which includes, without limitation, a proposed:*
 - (a) Increase of the maximum flow of the discharge;*
 - (b) Increase in the concentration of any parameter of concern in the discharge;*
 - (c) Increase in the load of any parameter of concern to the receiving water;*
 - (d) Change in the composition of the discharge which would require different effluent limitations; or*
 - (e) Relocation of the discharge.*
- 3. A new or altered zone of mixing.*

Sec. 14. *1. An antidegradation review required pursuant to section 13 of this regulation shall:*

- (a) Be conducted by the Department for each parameter of concern that is expected to be present in the point source discharge; and*
- (b) Evaluate the potential impacts of a point source discharge to the established baseline water quality and/or RMHQ for each parameter of concern in the receiving water.*

2. For the purpose of the evaluation conducted pursuant to subsection 1:

- (a) Except as otherwise provided in paragraph (b), the baseline water quality and/or any established RMHQ will be used to determine the appropriate level of antidegradation protection for each parameter of concern in the receiving water.*
- (b) If, as of the date of the permit application, insufficient data exists to establish the baseline water quality for each parameter of concern in the receiving water, the Director may allow for an IBV to be established per section 5 that will serve as an interim estimate of baseline water quality for permitting purposes.*
 - (1) The Department will require the applicant to submit a sampling and analysis plan (SAP) specifying the location and protocols for the collection and laboratory analysis of samples to establish baseline water quality as per section 4. The SAP must be submitted to the Department for approval a minimum of 90 days prior to the applicant commencing sampling activities.*
 - (2) Any IBV shall be valid for a period of no longer than one year beyond the timeframe required to establish the baseline water quality or until the RMHQ is approved by the Commission, whichever comes first.*
- (c) If the water quality for each parameter of concern in the point source discharge is the same or better than the established RMHQ, baseline water quality, or IBV*

required for Tier 2 level of antidegradation protection, the Department shall not require any additional analysis to authorize the point source discharge.

(d) If the water quality for a parameter of concern in the point source discharge is worse than the established RHM_Q, baseline water quality, or IBV required by Tier 2 level of antidegradation protection, the applicant must submit an analysis of alternatives to the Department. If no feasible alternative is identified, the applicant must submit a justification to the Department in accordance with section 15 of this regulation.

3. In addition to the requirements of subsection 1, if an applicant proposes a point source discharge into a Tier 2.5 water or upstream of a Tier 2.5 or Tier 3 water, the antidegradation review must demonstrate that authorization of the discharge will result in maintenance and protection of the “extraordinary aesthetic, ecological, or recreational value” beneficial use.

Sec. 15. *1. If the antidegradation review conducted by the Department pursuant to sections 13 and 14 of this regulation determines that an application to discharge will degrade the established RMH_Q, baseline water quality, or IBV for a parameter of concern having a Tier 2 level of antidegradation protection, the Department shall, for the purposes of NRS 445A.565, require the applicant to submit for the review of the Commission an analysis of alternatives which must include, without limitation:*

- (a) The information required in subsection 2 of NRS 445A.565;*
- (b) Alternative treatment technologies;*
- (c) Alternative discharge locations;*
- (d) Alternative processes that would improve discharge quality;*

- (e) Seasonal or controlled discharge; and*
 - (f) An alternative that does not result in the discharge.*
- 2. If an applicant is required to conduct an analysis of alternatives as a requirement of other permitting activities or environmental reviews, the same analysis may be submitted for the purposes of subsection 1 if such analysis meets the requirements of subsection 1.*
- 3. If the analysis of alternatives does not identify a technologically feasible and economically achievable alternative that would not result in the degradation of the established RMHQ, baseline water quality, or IBV for a parameter of concern in the receiving water:*
 - (a) The applicant must submit to the Department, for approval by the Commission, a justification based on the economic and/or social importance of the proposed discharge that demonstrates why the degradation of the water quality for the parameter of concern is necessary; and*
 - (b) For the purposes of NRS 445A.565, the Commission will hold a public hearing on an application subject to the provisions of this section.*
- 4. Following a hearing held pursuant to subsection 3, the Commission may approve the issuance of a permit by the Department that will result in the degradation of the established RMHQ, baseline water quality, or IBV for a parameter of concern in the receiving water if the Commission determines that:*
 - (a) The degraded water quality for the parameter of concern is justifiable because of economic or social considerations;*
 - (b) The discharge will not result in the parameter of concern in the receiving water failing to meet the applicable water quality standards set forth in NAC*

445A.11704 to 445A.2234, inclusive; and

(c) The discharge is consistent with the requirements set forth in this chapter and chapter 445A of NRS, including, without limitation, that:

(1) The highest and best degree of waste treatment available under existing technology that is reasonably consistent with the economic capability of the project or development is used to prevent or reduce water quality degradation in the receiving water; and

(2) All cost effective and reasonable best management practices for diffuse source pollution control required in accordance with this chapter and chapter 445A of NRS are achieved to prevent or reduce water quality degradation in the receiving water.

5. If the Commission approves the issuance of a permit that will result in the degradation of the established RMHQ, baseline water quality, or IBV for a parameter of concern pursuant to this section, the Department shall ensure that the effluent limitation established in the permit for the parameter of concern pursuant to NAC 445A.243 is not less protective than the applicable water quality standards for the receiving water.

Sec.16.

1. In accordance with section 14 of this regulation, the Department shall conduct an antidegradation review before issuing a general permit to evaluate the potential impact of a discharge on the established RMHQ, baseline water quality, or IBV in the receiving water if:

(a) A group of dischargers apply for a general permit pursuant to NAC 445A.268; or

(b) A general permit is issued without application pursuant to NAC 445A.268.

2. *Based on the antidegradation review conducted pursuant to subsection 1, any conditions and requirements deemed necessary by the Director shall be incorporated to ensure that the group of dischargers minimizes water quality degradation and complies with antidegradation requirements.*
3. *Except as otherwise provided in subsections 4 and 5, if a discharger submits a notice of intent to engage in an activity for which a general permit has been issued, the Director shall presume that the discharger will comply with all the permit conditions and any requirements imposed pursuant to subsection 2 and that antidegradation requirements will be met.*
4. *Upon renewal, the Director may modify the terms or conditions of a general permit as necessary to minimize water quality degradation in the receiving water.*
5. *For a proposed discharge into a receiving water having a Tier 2.5 level of antidegradation protection, the Director shall require the applicant to demonstrate that the baseline water quality will be maintained and protected. If this condition is met, the Director may approve the notice of intent, issue the general permit, or require the group or specific discharger to apply for an individual permit pursuant to NRS 445A.480.*

Sec. 17. *1. Except as otherwise provided in subsection 2, if a person submits an application for a storm water runoff permit or modification to a storm water runoff permit pursuant to NAC 445A.230 or 445A.263, the Director shall presume for the purposes of the antidegradation review that the applicant will comply with all the permit conditions and any requirements imposed pursuant to this chapter, including, without limitation, the development of a storm water management plan with best practices as defined in NAC 445A.306, to prevent,*

eliminate, or reduce the pollutants in storm water discharges to meet all antidegradation requirements.

Sec. 18. *Where potential water quality impairment is associated with a thermal discharge, this thermal discharge must comply with Section 316 of the Clean Water Act as amended.*

Sec. 19. NAC 445A.070 is hereby amended to read as follows:

445A.070 As used in NAC 445A.070 to 445A.348, inclusive, *and sections 2 to 18, inclusive, of this regulation*, unless the context otherwise requires, the words and terms defined in NAC 445A.071 to 445A.116, inclusive, have the meanings ascribed to them in those sections.

Sec. 20. NAC 445A.122 is hereby amended to read as follows:

445A.122 1. The following standards are intended to protect both existing and designated beneficial uses and must not be used to prohibit the use of the water as authorized under title 48 of NRS:

- (a) Watering of livestock. The water must be suitable for the watering of livestock without treatment.
- (b) Irrigation. The water must be suitable for irrigation without treatment.
- (c) Aquatic life. The water must be suitable as a habitat for fish and other aquatic life existing in a body of water. This does not preclude the reestablishment of other fish or aquatic life.
- (d) Recreation involving contact with the water. There must be no evidence of man-made pollution, floating debris, sludge accumulation or similar pollutants.
- (e) Recreation not involving contact with the water. The water must be free from:
 - (1) Visible floating, suspended or settled solids arising from human activities;
 - (2) Sludge banks;
 - (3) Slime infestation;

(4) Heavy growth of attached plants, blooms or high concentrations of plankton, discoloration or excessive acidity or alkalinity that leads to corrosion of boats and docks;

(5) Surfactants that foam when the water is agitated or aerated; and

(6) Excessive water temperatures.

(f) Municipal or domestic supply. The water must be capable of being treated by conventional methods of water treatment in order to comply with Nevada's drinking water standards.

(g) Industrial supply. The water must be treatable to provide a quality of water which is suitable for the intended use.

(h) Propagation of wildlife. The water must be suitable for the propagation of wildlife and waterfowl without treatment.

Extraordinary ecological, ~~or~~ aesthetic, *or recreational* value. ~~The~~ ~~unique~~ *important* ecological, ~~or~~ aesthetic, *or*

recreational value of the water must be maintained and protected. ~~The~~

(i) Enhancement of water quality. The water must support natural enhancement or improvement of water quality in any water which is downstream.

(j) Maintenance of a freshwater marsh. The water must be suitable for the maintenance of a freshwater marsh.

2. This section does not entitle an appropriator to require that the source meet his or her particular requirements for water quality.

Sec. 21. NAC 445A.1252 is hereby amended to read as follows:

445A.1252 The designated beneficial uses for select bodies of water within the Northwest Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Boulder Reservoir	The entire reservoir.	X	X	X	X	X	X		X					NAC 445A.1256
Blue Lakes	The entire area.	X	X	X	X	X	X		X					NAC 445A.1258

Bottle Creek	From its origin to the first point of diversion, near the east line of section 23, T. 40 N., R. 32 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1308
Quinn River, East and South Forks	From their origin to the confluence of the East and South Forks, except for the length of the river within the exterior borders of the Fort McDermitt Indian Reservation.	X	X	X	X	X	X		X					NAC 445A.1312
Quinn River (the slough)	From the Oregon-Nevada state line in section 31, T. 48 N., R. 38 E., M.D.B. & M., to the confluence with the main tributary of the Quinn River at the south line of section 17, T. 47 N., R. 38 E., M.D.B. & M., except for the length of the river within the exterior borders of the Fort McDermitt Indian Reservation.	X	X	X		X		X	X					NAC 445A.1316
Irrigation	Irrigation													
Livestock	Watering of livestock													
Contact	Recreation involving contact with the water													
Noncontact	Recreation not involving contact with the water													
Industrial	Industrial supply													
Municipal	Municipal or domestic supply, or both													
Wildlife	Propagation of wildlife													
Aquatic	Propagation of aquatic life													
Aesthetic	Extraordinary ecological, for aesthetic, <i>or recreational</i> value													
Enhance	Enhancement of water quality													
Marsh	Maintenance of a freshwater marsh													

Sec. 23. NAC 445A.1332 is hereby amended to read as follows:

445A.1332 The designated beneficial uses for select bodies of water within the Snake

Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Goose Creek	Within the State of Nevada.	X	X	X	X	X	X	X	X					NAC 445A.1336
Salmon Falls Creek	From the confluence of the North and South Forks of Salmon Falls Creek to the Nevada-Idaho state line.	X	X	X	X	X	X	X	X					NAC 445A.1338
Shoshone Creek	From the Nevada-Idaho state line to its confluence with Salmon Falls Creek.	X	X	X	X	X	X	X	X					NAC 445A.1342
Jarbridge River, East Fork	From its origin to the Nevada-Idaho state line.	X	X	X	X	X	X	X	X					NAC 445A.1344
Jarbridge River, above Jarbridge	From its origin to the bridge above the town of Jarbridge.	X	X	X	X	X	X	X	X					NAC 445A.1346
Jarbridge River, below Jarbridge	From the bridge above the town of Jarbridge to the Nevada-Idaho state line.	X	X	X	X	X	X	X	X					NAC 445A.1348
Bruneau River	From its origin to the Nevada-Idaho state line.	X	X	X	X	X	X	X	X					NAC 445A.1352
Owyhee River, above Mill Creek	From Wild Horse Reservoir to its confluence with Mill Creek.	X	X	X	X	X	X	X	X					NAC 445A.1354
Owyhee River, below Mill Creek	From its confluence with Mill Creek to the exterior border of the Duck Valley Indian Reservation.	X	X	X	X	X	X	X	X					NAC 445A.1356
Owyhee River, South Fork	From its origin to the Nevada-Idaho state line.	X	X	X	X	X	X	X	X					NAC 445A.1362
Salmon Falls Creek, North Fork	From the national forest boundary to its confluence with the South Fork of Salmon Falls Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1364
Salmon Falls Creek, South Fork	From the national forest boundary to its confluence with the North Fork of Salmon Falls Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1366
Camp Creek at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X		X					NAC 445A.1368
Camp Creek at the South Fork of Salmon Falls Creek	From the national forest boundary to its confluence with the South Fork of Salmon Falls Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1372
Cottonwood Creek at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X		X					NAC 445A.1374
Cottonwood Creek at the South Fork of Salmon Falls Creek	From the national forest boundary to its confluence with the South Fork of Salmon Falls Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1376
Canyon Creek at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X		X					NAC 445A.1378
Canyon Creek at the South Fork of Salmon Falls Creek	From the national forest boundary to its confluence with the South Fork of Salmon Falls Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1382

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Bear Creek	From its origin to the point of diversion for the Jarbidge municipal water supply, near the east line of section 17, T. 46 N., R. 58 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1384
76 Creek	The entire length.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1386
Owyhee River, East Fork above Wild Horse Reservoir	From its origin to Wild Horse Reservoir.	X	X	X	X	X	X		X					NAC 445A.1388
Deep Creek	From its origin to Wild Horse Reservoir.	X	X	X	X	X	X		X					NAC 445A.1392
Penrod Creek, including tributaries	From its origin, including its tributaries, to Wild Horse Reservoir.	X	X	X	X	X	X		X					NAC 445A.1394
Hendricks Creek	From its origin to Wild Horse Reservoir.	X	X	X	X	X	X		X					NAC 445A.1396
Wild Horse Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1398
Browns Gulch	From its origin to the point of diversion for the Mountain City municipal water supply, near the south line of section 24, T. 46 N., R. 53 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1402
Jack Creek	From its origin to its confluence with Harrington Creek.	X	X	X	X	X	X		X					NAC 445A.1404
Harrington Creek	From its confluence with Jack Creek to the South Fork of the Owyhee River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1406
Bull Run Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1408
Wilson Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1412
Taylor Canyon Creek	From its origin to its confluence with the South Fork of the Owyhee River.	X	X	X	X	X	X	X	X					NAC 445A.1414
Trout Creek at Goose Creek	From the Nevada-Idaho state line to its confluence with Goose Creek.	X	X	X	X	X	X	X	X					NAC 445A.1416
Trout Creek at Salmon Falls Creek	From its origin to its confluence with Salmon Falls Creek.	X	X	X	X	X	X	X	X					NAC 445A.1418
Jack Creek at Jarbidge River	From its origin to its confluence with the Jarbidge River.	X	X	X	X	X	X	X	X					NAC 445A.1422
Irrigation	Irrigation													
Livestock	Watering of livestock													
Contact	Recreation involving contact with the water													
Noncontact	Recreation not involving contact with the water													
Industrial	Industrial supply													
Municipal	Municipal or domestic supply, or both													
Wildlife	Propagation of wildlife													
Aquatic	Propagation of aquatic life													
Aesthetic	Extraordinary ecological, top aesthetic, <i>or recreational</i> value													
Enhance	Enhancement of water quality													

Sec. 24. NAC 445A.1432 is hereby amended to read as follows:

445A.1432 The designated beneficial uses for select bodies of water within the Humboldt Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Humboldt River near Osino	From the upstream source of the main stem to Osino.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1436
Humboldt River at Palisade	From Osino to the Palisade Gage.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1438
Humboldt River at Battle Mountain	From the Palisade Gage to the Battle Mountain Gage.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1442
Humboldt River at State Highway 789	From the Battle Mountain Gage to where State Highway 789 crosses the Humboldt River.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1444
Humboldt River at Imlay	From where State Highway 789 crosses the Humboldt River to Imlay.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1446
Humboldt River at Woolsey	From Imlay to Woolsey.	X	X	X	X	X	X	X	X				Warm-water fishery	NAC 445A.1448
Humboldt River at Rodgers Dam	From Woolsey to Rodgers Dam.	X	X	X	X	X	X	X	X					NAC 445A.1452
Humboldt River at the Humboldt Sink	From Rodgers Dam to the Humboldt Sink.	X	X	X	X	X		X	X					NAC 445A.1454
The Humboldt Sink	The entire sink.	X	X	X		X		X	X					NAC 445A.1455
Humboldt River, North Fork and tributaries at the national forest boundary	From their origin in the Independence Mountain Range to the national forest boundary.	X	X	X	X	X	X	X	X					NAC 445A.1456
Humboldt River, North Fork at Beaver Creek	From the national forest boundary to its confluence with Beaver Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1458
Humboldt River, North Fork at the Humboldt River	From its confluence with Beaver Creek to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1462
Humboldt River, South Fork at South Fork Reservoir, including tributaries above Lee	From its origin to South Fork Reservoir, including its tributaries above Lee, except for the length of the river and the lengths of its tributaries within the exterior borders of the South Fork Indian Reservation.	X	X	X	X	X	X	X	X					NAC 445A.1464
South Fork Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1465
Humboldt River, South Fork at the Humboldt River	From South Fork Reservoir to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1466

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Little Humboldt River	The entire length.	X	X	X	X	X	X	X	X					NAC 445A.1468
Little Humboldt River, North Fork at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1472
Little Humboldt River, North Fork at the South Fork of the Little Humboldt River	From the national forest boundary to its confluence with the South Fork of the Little Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1474
Little Humboldt River, South Fork at the Elko-Humboldt county line	From its origin to the Elko-Humboldt county line.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1476
Little Humboldt River, South Fork at the North Fork of the Little Humboldt River	From the Elko-Humboldt county line to its confluence with the North Fork of the Little Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1478
Marys River, upper	From its origin to the point where the river crosses the east line of T. 42 N., R. 59 E., M.D.B. & M.	X	X	X	X	X	X	X	X					NAC 445A.1482
Marys River at the Humboldt River	From the east line of T. 42 N., R. 59 E., M.D.B. & M., to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1484
Tabor Creek	From its origin to the east line of T. 40 N., R. 60 E., M.D.B. & M.	X	X	X	X	X	X	X	X					NAC 445A.1486
Maggie Creek Tributaries	From their origin to the point where they become Maggie Creek or the point of their confluence with Maggie Creek.	X	X	X	X	X	X	X	X					NAC 445A.1488
Maggie Creek at Jack Creek	From where it is formed by the Maggie Creek tributaries to its confluence with Jack Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1492
Maggie Creek at Soap Creek	From its confluence with Jack Creek to its confluence with Soap Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1494
Maggie Creek at the Humboldt River	From its confluence with Soap Creek to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1496
Secret Creek at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X	X	X					NAC 445A.1498
Secret Creek at the Humboldt River	From the national forest boundary to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1502

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Lamoille Creek at the gaging station	From its origin to gaging station number 10-316500, located in the NE 1/4 of section 6, T. 32 N., R. 58 E., M.D.B. & M.	X	X	X	X	X	X	X	X					NAC 445A.1504
Lamoille Creek at the Humboldt River	From gaging station number 10-316500, located in the NE 1/4 of section 6, T. 32 N., R. 58 E., M.D.B. & M., to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1506
J.D. Ponds	The entire area.	X	X	X	X	X	X	X	X					NAC 445A.1508
Denay Creek at Tonkin Reservoir	From its origin to Tonkin Reservoir.	X	X	X	X	X	X	X	X					NAC 445A.1512
Tonkin Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X					NAC 445A.1514
Denay Creek below Tonkin Reservoir	Below Tonkin Reservoir.	X	X	X	X	X	X	X	X					NAC 445A.1516
Rock Creek at Squaw Valley Ranch	From its origin to Squaw Valley Ranch.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1518
Rock Creek below Squaw Valley Ranch	Below Squaw Valley Ranch.	X	X	X	X	X	X	X	X					NAC 445A.1522
Willow Creek at Willow Creek Reservoir	From its origin to Willow Creek Reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1524
Willow Creek Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1526
North Antelope Creek	From its origin to its confluence with Antelope Creek.	X		X	X	X		X	X					NAC 445A.1527
Pole Creek	From its origin to the point of diversion of the Golconda water supply, near the north line of section 13, T. 35 N., R. 39 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1528
Water Canyon Creek	From its origin to the point of diversion of the Winnemucca municipal water supply, near the west line of section 12, T. 35 N., R. 38 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1532
Martin Creek at the national forest boundary	From its origin to the national forest boundary.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1534
Martin Creek below the national forest boundary	From the national forest boundary to the first diversion in T. 42 N., R. 40 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1536
Dutch John Creek	The entire length.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1538
Huntington Creek at the White Pine-Elko county line	From its origin to the White Pine-Elko county line.	X	X	X	X	X	X	X	X					NAC 445A.1542
Huntington Creek at Smith Creek	From the White Pine-Elko county line to its confluence with Smith Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1544

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Huntington Creek at the South Fork of the Humboldt River	From its confluence with Smith Creek to its confluence with the South Fork of the Humboldt River.	X	X	X	X	X	X	X	X					NAC 445A.1546
Green Mountain Creek at Toyn Creek	From its origin to its confluence with Toyn Creek.	X	X	X	X	X	X	X	X					NAC 445A.1548
Toyn Creek at Corral Creek	From its confluence with Green Mountain Creek to its confluence with Corral Creek.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1552
Toyn Creek at Green Mountain Creek	From its origin to its confluence with Green Mountain Creek.	X	X	X	X	X	X	X	X					NAC 445A.1554
Reese River at Indian Creek	From its origin to its confluence with Indian Creek, except for the length of the river within the exterior borders of the Yomba Indian Reservation.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1556
Reese River at State Route 722	From its confluence with Indian Creek to State Route 722 (old U.S. Highway 50), except for the length of the river within the exterior borders of the Yomba Indian Reservation.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1558
Reese River below State Route 722	North of State Route 722 (old U.S. Highway 50).	X	X	X	X	X	X	X	X					NAC 445A.1562
San Juan Creek	From its origin to the national forest boundary.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1564
Big Creek at the forest service campground	From its origin to the east boundary of the United States Forest Service's Big Creek Campground.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1566
Big Creek below the forest service campground	From the east boundary of the United States Forest Service's Big Creek Campground to the first diversion dam, near the west line of section 4, T. 17 N., R. 43 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1568
Mill Creek	From its origin to the first point of diversion, near the south line of section 22, T. 29 N., R. 44 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1572
Lewis Creek	From its origin to the first point of diversion, near the center of section 23, T. 30 N., R. 45 E., M.D.B. & M.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1574
Iowa Canyon Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1576

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Starr Creek	From the confluence of Ackler and Herder Creeks to its confluence with the Humboldt River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1578
Irrigation	Irrigation													
Livestock	Watering of livestock													
Contact	Recreation involving contact with the water													
Noncontact	Recreation not involving contact with the water													
Industrial	Industrial supply													
Municipal	Municipal or domestic supply, or both													
Wildlife	Propagation of wildlife													
Aquatic	Propagation of aquatic life													
Aesthetic	Extraordinary ecological, for aesthetic, <i>or recreational</i> value													
Enhance	Enhancement of water quality													
Marsh	Maintenance of a freshwater marsh													

Sec. 25. NAC 445A.1622 is hereby amended to read as follows:

445A.1622 The designated beneficial uses for select bodies of water within the Truckee

Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Lake Tahoe	Existing sampling points.	X	X	X	X	X	X	X	X	X			Cold-water fishery	NAC 445A.1626
Lake Tahoe Tributaries	All tributaries to Lake Tahoe located in Nevada and which are not included in NAC 445A.1632 to 445A.1666, inclusive.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1628
Incline Creek, East Fork at the ski resort	From its origin to the ski resort.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1632
Incline Creek, West Fork at State Highway 431	From its origin to State Highway 431.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1634

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Incline Creek, East Fork; Incline Creek, West Fork; and Incline Creek	The East Fork of Incline Creek from the ski resort to the West Fork of Incline Creek, the West Fork of Incline Creek from State Highway 431 to the East Fork of Incline Creek, and Incline Creek from the confluence of the East and West Forks of Incline Creek to Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1636
Third Creek, East Fork at State Highway 431	From its origin to State Highway 431.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1638
Third Creek, East Fork; Third Creek, West Fork; and Third Creek	The East Fork of Third Creek from State Highway 431 to the West Fork of Third Creek, the West Fork of Third Creek from its origin to the East Fork of Third Creek, and Third Creek from the confluence of the East and West Forks of Third Creek to Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1642
Wood Creek	From its origin to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1644
Second Creek at Second Creek Drive	From its origin to Second Creek Drive.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1646
Second Creek at Lakeshore Drive	From Second Creek Drive to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1648
First Creek at Dale and Knotty Pine Drives	From its origin to Dale and Knotty Pine Drives.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1652
First Creek at Lakeshore Drive	From Dale and Knotty Pine Drives to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1654
Glenbrook Creek	From its origin to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1656
Logan House Creek	From its origin to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1658
Eagle Rock Creek	From its origin to its confluence with Edgewood Creek.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1662
Edgewood Creek at Palisades Drive	From its origin to 50 feet downstream from the culvert at Palisades Drive.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1664
Edgewood Creek at Stateline	From 50 feet downstream from the culvert at Palisades Drive to its confluence with Lake Tahoe.	X	X	X	X	X	X	X	X		X		Cold-water fishery	NAC 445A.1666
Truckee River at the state line	At the California-Nevada state line.	X	X	X	X	X	X	X	X				All life stages of mountain whitefish, rainbow trout and brown trout	NAC 445A.1682
Truckee River at Idlewild	From the California-Nevada state line to Idlewild.	X	X	X	X	X	X	X	X				All life stages of mountain whitefish, rainbow trout and brown trout	NAC 445A.1684

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Truckee River at East McCarran	From Idlewild to the East McCarran Boulevard Bridge.	X	X	X	X	X	X	X	X				All life stages of mountain whitefish, rainbow trout and brown trout	NAC 445A.1686
Truckee River at Lockwood Bridge	From the East McCarran Boulevard Bridge to the Lockwood Bridge.	X	X	X	X	X	X	X	X				Juvenile and adult rainbow trout and brown trout	NAC 445A.1688
Truckee River at Derby Dam	From the Lockwood Bridge to Derby Dam.	X	X	X	X	X	X	X	X				Juvenile and adult rainbow trout and brown trout. However, the species which are sensitive to temperature are expected to seek a cooler microhabitat during July and August	NAC 445A.1692
Truckee River at the Pyramid Lake Paiute Reservation	From Derby Dam to the exterior border of the Pyramid Lake Paiute Reservation.	X	X	X	X	X	X	X	X				Early spawning Lahontan cutthroat trout and their incubation, larvae, juveniles and migration, from May through June, depending on hydrologic conditions	NAC 445A.1694
Bronco Creek	From its origin to the California-Nevada state line.	X	X	X	X	X	X	X	X					NAC 445A.1698
Gray Creek	From its origin to the California-Nevada state line.	X	X	X	X	X	X	X	X					NAC 445A.1702
Hunter Creek at Hunter Lake	From its origin to Hunter Lake.	X	X	X	X	X	X		X					NAC 445A.1704
Hunter Lake	The entire lake.	X	X	X	X	X	X		X					NAC 445A.1706
Hunter Creek at the Truckee River	From Hunter Lake to its confluence with the Truckee River.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1708
Washoe Lakes	The entire lakes.	X	X	X	X	X	X	X	X					NAC 445A.1722
Steamboat Creek at the gaging station	From Little Washoe Lake to gaging station number 10-349300, located in the S 1/2 of section 33, T. 18 N., R. 20 E., M.D.B. & M.	X	X	X	X	X	X	X	X					NAC 445A.1724
Steamboat Creek at the Truckee River	From gaging station number 10-349300, located in the S 1/2 of section 33, T. 18 N., R. 20 E., M.D.B. & M., to its confluence with the Truckee River.	X	X	X	X	X		X	X					NAC 445A.1726

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference

Wildlife	Propagation of wildlife													
Aquatic	Propagation of aquatic life													
Aesthetic	Extraordinary ecological, for aesthetic, <i>or recreational</i> value													
Enhance	Enhancement of water quality													
Marsh	Maintenance of a freshwater marsh													

Sec. 26. NAC 445A.1792 is hereby amended to read as follows:

445A.1792 The designated beneficial uses for select bodies of water within the Carson

Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Carson River, West Fork at the state line	At the California-Nevada state line.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1796
Bryant Creek near the state line	From the California-Nevada state line to its confluence with the East Fork of the Carson River.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1798
Carson River, East Fork at the state line	At the California-Nevada state line.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1802
Carson River, East Fork at U.S. Highway 395 south of Gardnerville	From the California-Nevada state line to the Riverview Mobile Home Park at U.S. Highway 395 south of Gardnerville, except for the length of the river within the exterior borders of the Washoe Indian Reservation.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1804
Carson River, East Fork at Muller Lane	From the Riverview Mobile Home Park at U.S. Highway 395 to Muller Lane, except for the length of the river within the exterior borders of the Washoe Indian Reservation.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1806
Carson River at Genoa Lane	The East Fork of the Carson River from Muller Lane to the West Fork, the West Fork of the Carson River from the California-Nevada state line to the East Fork, and the main stem of the Carson River from the confluence of the East and West Forks to Genoa Lane.	X	X	X	X	X	X	X	X				Catfish, rainbow trout and brown trout	NAC 445A.1808
Carson River at Cradlebaugh Bridge	From Genoa Lane to U.S. Highway 395 at Cradlebaugh Bridge, except for the length of the river within the exterior borders of the Washoe Indian Reservation.	X	X	X	X	X	X	X	X				Catfish, rainbow trout and brown trout	NAC 445A.1812
Carson River at the Mexican Ditch Gage	From U.S. Highway 395 at Cradlebaugh Bridge to the Mexican Ditch Gage.	X	X	X	X	X	X	X	X				Rainbow trout and brown trout	NAC 445A.1814
Carson River near New Empire	From the Mexican Ditch Gage to New Empire.	X	X	X	X	X	X	X	X				Smallmouth bass, rainbow trout and brown trout	NAC 445A.1816

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Carson River at Dayton Bridge	From New Empire to the Dayton Bridge.	X	X	X	X	X	X	X	X				Walleye, channel catfish and white bass	NAC 445A.1818
Carson River at Lahontan Reservoir	From the Dayton Bridge to Lahontan Reservoir.	X	X	X	X	X	X	X	X				Walleye, channel catfish and white bass	NAC 445A.1822
Lahontan Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X				Walleye, channel catfish and white bass	NAC 445A.1824
Lower Carson River	From Lahontan Reservoir to the Carson Sink (the natural channel).	X	X	X	X	X	X	X	X					NAC 445A.1826
Daggett Creek	From its origin to the Carson River.	X	X	X	X	X	X		X					NAC 445A.1828
Genoa Creek	From its origin to the first diversion box at the mouth of the canyon, near the east line of section 9, T. 13 N., R. 19 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1832
Sierra Canyon Creek	From its origin to the first diversion structure at the mouth of the canyon, near the east line of section 4, T. 13 N., R. 19 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1834
Clear Creek at the gaging station	From its origin to gaging station number 10-3105, located in the NE 1/4 of the NW 1/4 of section 1, T. 14 N., R. 19 E., M.D.B. & M., except for the length of the creek within the exterior borders of the Washoe Indian Reservation.	X	X	X	X	X	X		X					NAC 445A.1836
Clear Creek at the Carson River	From gaging station number 10-3105, located in the NE 1/4 of the NW 1/4 of section 1, T. 14 N., R. 19 E., M.D.B. & M., to the Carson River, except for the length of the creek within the exterior borders of the Washoe Indian Reservation.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1838
Kings Canyon	From its origin to the point of diversion of the Carson City Water Department, near the east line of section 23, T. 15 N., R. 19 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1842
Ash Canyon	From its origin to the first point of diversion of the Carson City Water Department, near the west line of section 12, T. 15 N., R. 19 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1844
V-Line Canal	From the Carson diversion dam to its division into the S and L Canals.	X	X	X	X	X	X	X	X					NAC 445A.1846
Rattlesnake Reservoir	The entire reservoir; also known as S-Line Reservoir.	X	X	X	X	X	X	X	X					NAC 445A.1848

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Indian Lakes	All the lakes, including Upper Lake, Likes Lake, Papoose Lake, Big Indian Lake, Little Cottonwood Lake, Big Cottonwood Lake and East Lake.	X	X	X	X	X	X	X	X					NAC 445A.1852
Diagonal Drain	The entire length.	X	X	X	X	X	X	X	X					NAC 445A.1854
South Carson Lake	The entire lake; also known as Government Pasture and the Greenhead Gun Club.	X	X	X	X	X	X	X	X					NAC 445A.1856
Harmon Reservoir	The entire reservoir.	X	X	X	X	X	X	X	X					NAC 445A.1858
Stillwater Marsh east of Westside Road	East of Westside Road and north of the community of Stillwater.	X	X	X	X	X	X	X	X					NAC 445A.1862
Stillwater Marsh west of Westside Road	West of Westside Road and south of the community of Stillwater.	X	X	X		X		X	X					NAC 445A.1864
Irrigation	Irrigation													
Livestock	Watering of livestock													
Contact	Recreation involving contact with the water													
Noncontact	Recreation not involving contact with the water													
Industrial	Industrial supply													
Municipal	Municipal or domestic supply, or both													
Wildlife	Propagation of wildlife													
Aquatic	Propagation of aquatic life													
Aesthetic	Extraordinary ecological, for aesthetic, <i>or recreational</i> value													
Enhance	Enhancement of water quality													
Marsh	Maintenance of a freshwater marsh													

Sec. 27. NAC 445A.1882 is hereby amended to read as follows:

445A.1882 The designated beneficial uses for select bodies of water within the Walker

Region are prescribed in this section:

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Walker River, West Fork at the state line	At the California-Nevada state line.	X	X	X	X	X	X	X	X				Mountain whitefish, rainbow trout and brown trout	NAC 445A.1886

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Topaz Lake	At various points in Topaz Lake.	X	X	X	X	X	X	X	X				Rainbow trout, cutthroat trout, brown trout, kokanee salmon and silver salmon	NAC 445A.1888
Walker River, West Fork near Wellington	From the California-Nevada state line to near Wellington.	X	X	X	X	X	X	X	X				Mountain whitefish, rainbow trout and brown trout	NAC 445A.1892
Walker River, West Fork at the East Fork at the Walker River	Near Wellington to its confluence with the East Fork of the Walker River near Nordyke Road.	X	X	X	X	X	X	X	X				Brown trout and rainbow trout	NAC 445A.1894
Sweetwater Creek	From the California-Nevada state line to its confluence with the East Fork of the Walker River.	X	X	X	X	X	X	X	X				Mountain whitefish, brown trout, brook trout and rainbow trout	NAC 445A.1896
Walker River, East Fork at the state line	At the California-Nevada state line.	X	X	X	X	X	X	X	X				Mountain whitefish, rainbow trout and brown trout	NAC 445A.1898
Walker River, East Fork at Bridge B-1475	From the California-Nevada state line to Bridge B-1475.	X	X	X	X	X	X	X	X				Mountain whitefish, rainbow trout and brown trout	NAC 445A.1902
Walker River, East Fork at the West Fork of the Walker River	From Bridge B-1475 to its confluence with the West Fork of the Walker River near Nordyke Road.	X	X	X	X	X	X	X	X				Brown trout and rainbow trout	NAC 445A.1904
Walker River at the Walker River Indian Reservation	From the confluence of the East Fork of the Walker River and the West Fork of the Walker River to the exterior border of the Walker River Indian Reservation.	X	X	X	X	X	X	X	X				Channel catfish and largemouth bass	NAC 445A.1906
Walker River at Walker Lake	From the exterior border of the Walker River Indian Reservation to Walker Lake.	X	X	X	X	X	X	X	X				Channel catfish, largemouth bass and, from February through June when an adequate flow exists, adult Lahontan cutthroat trout and adult rainbow trout	NAC 445A.1908
Walker Lake	The entire lake.			X	X	X			X				Tui chub, Tahoe sucker, and adult and juvenile Lahontan cutthroat trout	NAC 445A.1914

Water Body Name	Segment Description	Beneficial Uses											Aquatic Life Species of Concern	Water Quality Standard NAC Reference
		Livestock	Irrigation	Aquatic	Contact	Noncontact	Municipal	Industrial	Wildlife	Aesthetic	Enhance	Marsh		
Desert Creek	From the California-Nevada state line to its confluence with the West Fork of the Walker River.	X	X	X	X	X	X	X	X				Brown trout, brook trout and rainbow trout	NAC 445A.1916
Mason Valley Wildlife Management Area - Bass, Crappie and North Ponds and Hinkson Slough	Hinkson Slough, Bass Pond, Crappie Pond and North Pond.	X	X	X	X	X	X	X	X				Trout	NAC 445A.1918
Mason Valley Wildlife Management Area	All surface water impoundments, excluding Hinkson Slough, Bass Pond, Crappie Pond and North Pond.	X	X	X	X	X	X	X	X					NAC 445A.1922
Cottonwood Creek	From its origin to the point of diversion of the Hawthorne Naval Ammunition Depot, near the north line of section 34, T. 9 N., R. 28 E., M.D.B. & M.	X	X	X	X	X	X		X					NAC 445A.1926

Enhance	Enhancement of water quality													
Marsh	Maintenance of a freshwater marsh													

Sec. 31. NAC 445A.233 is hereby amended to read as follows:

445A.233 1. The Department shall formulate and prepare tentative determinations regarding permit applications in advance of public notice of the proposed issuance or denial of the permit. The tentative determinations must include at least the following:

(a) A proposed determination to issue or deny a permit for the discharge described in the application; and

(b) If the determination proposed in paragraph (a) is to issue the permit, the following additional tentative determinations must be made:

(1) The proposed effluent limitations, identified pursuant to NAC 445A.243, for those pollutants proposed to be limited;

(2) A proposed schedule of compliance, including interim dates and requirements, for meeting the proposed effluent limitations, identified pursuant to NAC 445A.244; ~~and~~

(3) A brief description of any other proposed special conditions, apart from those required in NAC 445A.229, 445A.243, 445A.244, 445A.245, 445A.247, 445A.256 to 445A.259, inclusive, and 445A.262, which will have a significant impact upon the discharge described in the application ~~H~~;

(4) The findings from the antidegradation review if required pursuant to section 13 of this regulation; and

(5) The determination of the Commission on the issuance of a permit that will result in degradation of the baseline water quality of a parameter of concern in the receiving water if required pursuant to section 15 of this regulation.

2. The Director shall organize the tentative determinations prepared pursuant to subsection 1 into a draft permit.

Sec. 32. NAC 445A.236 is hereby amended to read as follows:

445A.236 1. For every discharge for which public notice was required pursuant to NAC 445A.234, the Director shall prepare and, following the public notice, shall send upon request to any person a fact sheet with respect to the application described in the public notice. The contents of such fact sheets must include at least the following information:

(a) A sketch or detailed description of the location of the discharge described in the application;

(b) A quantitative description of the discharge described in the application which includes at least the following:

(1) The rate or frequency of the proposed discharge and, if the discharge is continuous, the average daily flow in gallons per day or million gallons per day;

(2) For thermal discharges subject to limitation under the Act, the average summer and winter temperatures in degrees Fahrenheit; and

(3) The average daily discharge in pounds per day of any pollutants which are present in significant quantities or which are subject to limitations or prohibition under § 301, 302, 306 or 307 of the Act, 33 U.S.C. § 1311, 1312, 1316 or 1317, and regulations published thereunder;

(c) The tentative determinations required under NAC 445A.233;

(d) A brief citation, including a brief identification of the uses for which the receiving waters have been classified, of the water quality standards and limitations applied to the proposed discharge; ~~and~~

(e) *The findings from the antidegradation review if required pursuant to section 13 of this regulation;*

(f) *The determination of the Commission on the issuance of a permit that will result in the degradation of the baseline water quality of a parameter of concern in the receiving water if required pursuant to section 15 of this regulation, which must include, without limitation, both the reasoning of the Commission and information supporting the reasoning of the Commission; and*

(g) A fuller description of the procedures for the formulation of final determinations than that given in the public notice including:

(1) The 30-day comment period required by subsection 3 of NAC 445A.234;

(2) Procedures for requesting a public hearing and the nature thereof; and

(3) Any other procedures by which the public may participate in the formulation of the final determinations.

2. The Director shall add the name of any person or group upon request to a mailing list to receive copies of fact sheets.

Sec. 33. NAC 445A.241 is hereby amended to read as follows:

445A.241 1. The duration of permits is fixed and does not exceed 5 years. The expiration date must be recorded on each permit issued. A new application must be filed with the Department to obtain renewal or modification of a permit. Applications for renewal must be filed at least 180 days prior to expiration of the permit.

2. ~~For~~ *For* the reissuance of a permit, the same procedures must be followed as for the initial issuance of a permit.

3. A person who holds an expired permit and who has submitted a timely application for renewal of the permit in the manner set forth in subsection 1 may continue to conduct the permitted activity in accordance with the terms and conditions of the expired permit until the Department takes final action on the application unless:

(a) The Department determines that the permittee is not in substantial compliance with the terms and conditions of the expired permit or with a compliance schedule designed to bring the permittee in compliance with the terms and conditions of the expired permit;

(b) The Department, as a result of an action or the failure to act of the permittee, has been unable to take final action on the application on or before the expiration date of the permit; or

(c) The permittee has submitted an application with major deficiencies or has failed to supplement properly the application in a timely manner after being informed of deficiencies.

Sec. 34. NAC 445A.243 is hereby amended to read as follows:

445A.243 In establishing an effluent limitation to carry out the policy of this State set forth in NRS 445A.305, consideration must be given to, but is not limited by, the following:

1. The effect of the discharge on the receiving waters and its beneficial use.
2. The need for standards that specify by chemical, physical, biological or other characteristics the extent to which pollution by various substances will not be tolerated.
3. Standards for water quality and effluent limitations promulgated from time to time by the United States Environmental Protection Agency, including the following:

- (a) Effluent limitations under §§ 301 and 302 of the Act, 33 U.S.C. §§ 1311 and 1312.
- (b) Standards of performance for new sources under § 306 of the Act, 33 U.S.C. § 1316.
- (c) Effluent standards, effluent prohibitions and pretreatment standards under § 307 of the Act, 33 U.S.C. § 1317.

- (d) Any more stringent limitations, including those:

- (1) Necessary to meet standards for water quality and treatment or schedules of compliance, established pursuant to any state law or regulation;

- (2) Necessary to meet any other federal law or regulation; ~~or~~

- (3) Required to carry out any applicable standards for water quality ~~H~~; *or*

- (4) Necessary to carry out the antidegradation requirements set forth in sections 2 to 18, inclusive, of this regulation.*

↪ Such limitations must include any legally applicable requirements necessary to carry out total maximum daily loads established pursuant to § 303(d) of the Act, 33 U.S.C. § ~~H303(d)~~ *1313(d)*, and incorporated in the continuing planning process approved under § 303(e) of the Act, 33 U.S.C. § ~~H303(e)~~ *1313(e)*, and any regulations and guidelines issued thereunder.

(e) Any more stringent legally applicable requirements necessary to comply with a plan approved pursuant to § 208(b) of the Act.

4. In the application of water quality standards and limitations and other legally applicable requirements pursuant to subsection 3, the Director shall, for each issued NPDES permit, specify average and maximum daily quantitative limitations for the level of pollutants in the authorized discharge in terms of mass, except quantitative limitations that are not appropriately expressed in terms of mass, including, without limitation, pH, temperature and radiation.

Sec. 35. NAC 445A.268 is hereby amended to read as follows:

445A.268 1. A general permit may be issued upon proper application by a group of dischargers whose facilities meet the requirements of NAC 445A.266. The application must include:

- (a) The name and address of the discharger;
- (b) The exact location of the discharge;
- (c) The nature of the discharge;
- (d) The name and location of the receiving waters;
- (e) The quantity and quality of the discharge; and
- (f) Any other information deemed necessary by the Director for the determination of whether the discharger should be included in the general permit.

2. A general permit may be issued without application if the Director deems it appropriate.

If a general permit is issued without application, the Department shall conduct an antidegradation review in accordance with section 16 of this regulation.

3. If a general permit has been issued, a discharger who is eligible to be covered under the permit may submit a request to the Director to be included in the general permit. Such a request must include the information required by subsection 1, be accompanied by a nonrefundable fee:

(a) Of \$700, if the discharger is a facility described in subparagraph (1) of paragraph (c) of subsection 2 of NAC 445A.228; or

(b) Of \$200, if the discharger is not a facility described in subparagraph (1) of paragraph (c) of subsection 2 of NAC 445A.228,

↪ and be signed in the manner prescribed by NAC 445A.231 for application and reporting forms. If such a request is denied because the Director has determined that the discharger must be covered under an individual permit, the Director must inform the holder pursuant to the provisions of NAC 445A.269.

4. A discharger will not be covered under a general permit until the discharger has been notified by the Director.

5. A discharger who is covered under a general permit and:

(a) Is a facility described in subparagraph (1) of paragraph (c) of subsection 2 of NAC 445A.228 shall pay to the Director a nonrefundable fee of \$700 not later than July 1 of each year that the discharger is covered under that permit.

(b) Is not a facility described in subparagraph (1) of paragraph (c) of subsection 2 of NAC 445A.228 shall pay to the Director a nonrefundable fee of \$200 not later than July 1 of each year that the discharger is covered under that permit.

Sec. 36. NAC 445A.297 is hereby amended to read as follows:

445A.297 1. Each application for a zone of mixing must be reviewed in light of the descriptions, statements, plans, histories , *antidegradation review, if applicable*, and other supporting information.

2. The review must result in a determination by the Director concerning the appropriateness of a zone of mixing for each water quality parameter, by discharge, identified in the application.

3. Zones of mixing must not be granted by the Director unless the applicant and supporting information clearly demonstrate that the discharge occurring or proposed to occur:

(a) Does not substantially endanger human health or safety;

(b) Will assure the protection and propagation of a balanced, indigenous population of shellfish, fish and wildlife in and on that body of water; ~~and~~

(c) Will not cause a violation of water quality standards at any point designated by the Director ~~and~~ ; *and*

(d) Is consistent with the antidegradation provisions set forth in sections 2 to 18, inclusive, of this regulation.

Sec. 37. NAC 445A.298 is hereby amended to read as follows:

445A.298 1. The Director shall establish a zone of mixing so that the standards for quality of water for individual parameters determined to be appropriate pursuant to subsection 1 of NAC 445A.297 for the receiving water, but in no case including esthetic and acute toxicity values, may be relaxed within the zone of mixing.

2. In determining the size of a zone of mixing, each application must be reviewed on a case-by-case basis taking into consideration ~~the~~ :

(a) The quality of effluent of wastewater discharged ~~and the~~ ;

(b) The nature and condition of the receiving water, including the effects of the effluent or wastewater on the designated or actual beneficial uses of the receiving water and standards for quality of water ~~†~~ ; *and*

(c) The antidegradation review if required pursuant to section 13 of this regulation.

Sec. 38. NAC 445A.302 is hereby amended to read as follows:

445A.302 1. Any zone of mixing may be granted or renewed for periods not exceeding 5 years.

2. Applications for renewal:

(a) Must be made before the expiration of the period concerning the zone of mixing.

(b) May be granted by the Director if the application for renewal ~~has~~ :

(1) Has met all of the conditions specified for the immediately preceding zone of mixing granted pursuant to NAC 445A.295 to 445A.302, inclusive ~~†~~ ; *and*

(2) Is consistent with the antidegradation provisions set forth in sections 2 to 18, inclusive, of this regulation.
