

To the Nevada Division of Environmental Protection:

Nevadans cherish their rivers, streams, lakes, springs and wetlands, particularly because of their recreation opportunities, unique scenic beauty, and importance to fish and wildlife. Nevadans understand that for some waters, the highest and best use is to protect these priceless and irreplaceable ecological and aesthetic values and other unique characteristics.

For these reasons, it is important that the state sets forth a designation process that allows the public access to a critical tool for safeguarding and preventing water quality degradation in Nevada's most extraordinary waters.

The state's authority under the Clean Water Act to designate water bodies as Ecological and Aesthetic Waters (EA Waters) is a critical tool for protecting rivers, lakes, and streams with high water quality or other unique characteristics. However, the policy the state is proposing for granting these protections is unclear, inconsistent, and makes it extremely difficult, if not impossible, for the public to even nominate water bodies for EA Waters protections.

As the state drafts new regulations to protect EA Waters we urge you to implement strong protections for the state's highest value waters and create a straightforward process for the public to nominate these waters. It is essential that our valuable waters — which are critical to our Nevada way of life — receive the special protections they deserve.
